Verizon, T-Mobile, AT&T Tied in Network Speed Tests

Three of the four leading mobile service providers in the U.S. are in a near-tie for fastest networks, according to the eighth annual speed tests by PCMag. Published yesterday, the head-to-head comparisons show that Verizon continues to hold the top spot in overall mobile network speeds nationwide.

Across three dozen regions, however, the Verizon's speeds are essentially matched by AT&T and T-Mobile. Sascha Segan, PCMag's lead mobile analyst, said it was "the first time we've seen that kind of an even divide."

Meanwhile, the fourth top mobile service provider, Sprint, lags significantly behind its competitors this year, the tests found. While its numbers improved dramatically in 2015 and 2016, its network performance this year was uneven, with low speeds in some regions causing its overall results to suffer.

After LTE, Faster Speeds Coming with 5G

Using a customized version of Ookla's Speedtest software (Ookla is owned by the same parent company that owns PCMag), this year's network tests gathered more than 124,000 data points across 30 cities and six suburban/rural areas along the East Coast, West Coast and the country's midsection. The tests were conducted between May 1- May 23 using Samsung Galaxy S8 smartphones, which Segan noted is "currently the only device able to access new 'gigabit LTE' networks at full speed."

By averaging individual scores for each carrier across the U.S., PCMag ranked Verizon in this year's top spot with an overall score of 97 out of a possible 100. T-Mobile achieved an overall score of 96, followed by AT&T with 93 and Sprint with 74.

Those scores include numbers for average download speed (counting for 20 percent of the total score), download speeds over a threshold of 5 Mbps (20 percent), ping time (20 percent), reliability (20 percent), average upload speeds (10 percent), and upload speeds over a threshold of 2 Mbps (10 percent).

Since PCMag conducted its first tests in 2010, average mobile speeds have increased dramatically as carriers transitioned from 3G service to LTE and 4G. While LTE networks still have room to grow, the next big leap in speeds is expected to arrive with 5G over the next few years.

Fastest Carriers Vary by City, Region

"The leaps and bounds we've seen over the past few years show no sign of stopping," according to Segan. "Looking at the maximum download speeds,

it looks like there's a 2x jump every two years or so -- "from 50-60 Mbps in 2014, to 120 Mbps in 2016, and now to 200 Mbps."

This year's regional test results show T-Mobile with the fastest speeds in the Northeast and Northwest; T-Mobile and Verizon with a tie in the Southeast; Verizon at the top spots in the North Central and Southwest regions; and AT&T leading in the South Central region.

At the city level, Verizon offers the fastest mobile speeds in New York City, Los Angeles, and Phoenix; AT&T leads in Austin, Texas, Chicago, Indianapolis, San Diego, and San Francisco; and T-Mobile offers the highest speeds in Dallas, Houston, Miami, and Philadelphia.

PCMag's latest findings are consistent with other recent speed tests, including those released by OpenSignal in February. OpenSignal's report, based on crowdsourced monitoring across 36 U.S. cities, put Verizon and T-Mobile in a near-tie. It also found that 25 cities are served by one or more providers that deliver average LTE speeds faster than 20 Mbps.

LG K10 POWER SURPRISES YOU WITH UNPRECEDENTED BATTERY LIFE

LG K10 POWER SURPRISES YOU WITH UNPRECEDENTED BATTERY LIFE

With a powerful 26-hour battery life, portable chargers are a thing of the past

The 4,500mAh battery of the K10 power provides up to 26 hours of talk time, 19 hours of web browsing or 18 hours of video viewing[1] from a single charge. Users can enjoy a carefree multimedia experience without the burden of a portable charger. With high-speed charging, the K10 power can be fully charged in two hours[2]. Users can enjoy movies or play games on their phones anywhere, anytime without worrying about battery drain.

Diversified camera functions

The 5.5-inch HD In-cell Touch display of the LG K10 power offers an immersive viewing experience with rich, vibrant colors, even under bright sunlight. K10 power also sports a 5MP wide-angle selfie lens complemented with the front-facing soft light LED flash, allowing users to easily capture quality group shots. Not enough? With Auto Shot and Gesture Interval Shot, the shutter of the handset will be triggered as soon as a face or hand gesture is detected, bringing users a hassle-free shooting experience. What's more, posting a favorite image is just one tap away with Quick Share! The 13MP primary camera features Zero Shutter Lag for quick, delay-free shots to capture the magnificent moment.

The LG K10 power features a 1.5GHz octa-core processor and runs on Android 7.0 Nougat. The handset also supports an external MicroSD memory card up to 2TB, for stellar processing

power and more storage for multimedia files.

Price and Launch Date

LG's new K10 power smartphone comes in Blue and Gold, and is available from 26th of May at the suggested retail price of HK\$1,898.

Alcatel Launches A5 LED, the World's First Interactive LED-covered Smartphone

Offering dazzling moments for young and energetic entertainment seekers

Alcatel today announced the launch of Alcatel A5 LED at Mobile World Congress. The world's first interactive LED-covered smartphone, A5 LED delivers on Alcatel's enjoy.now promise with innovations for energetic young consumers.

"With the A5 LED, Alcatel is delivering new fun features, like light-up notifications and unique LED cover patterns and themes you create yourself, as well as an enhanced multimedia experience and more ways to take and share selfies, ideal for people who value having fun and letting their personality shine." said William Dowie, Portfolio Management Director, Alcatel.

Stand out from the crowd

Offering a unique and interactive experience found only in the A5, Alcatel puts you in charge of how you want to show off your smartphone personality with a dazzling array of LED light shows:

- Light up your notifications with a different light show for important incoming calls, messages, alarms, and social media alerts.
- Light up your life using Color Catcher 2.0 by creating unique LED cover patterns and themes for a different look every day.
- Light up your imagination with an eye-catching personalized light show.
- Light up your music, with light shows that move with your tunes, switching with a simple shake.

Solid performance and fun selfie features

The A5 LED also gives you a great multimedia experience. It has fast 4G LTE connectivity and an octa-core processor that ensures photos, games, and movies load smoothly to the large 5.2-inch HD display.

Alcatel A5 LED also has a 5MP front camera with selfie flash for brighter selfies even in low light. It comes with Face Beauty software for flawless images and Face Show, which lets you turn your selfies into personalized video clips for extra fun. There is also an 8MP rear camera with dual-tone flash. Plus, you can also enjoy Private Mode, with a different sign-in to protect your hidden photos and apps.

The Alcatel A5 LED fits comfortably into the hand, with an ergonomic design that boasts a slim profile and rounded edges.

➤ Thailand to link 3,920 villages with fiber by mid-2018

Thailand's first state-provided high speed fixed broadband services for rural areas are on track to launch by mid-2018, according to reports.

The fiber-based service will be offered to 3,920 border villages across 62 provinces by this time, providing broadband at speeds of at least 10Mbps, the Bangkok Post reported.

The low cost services will start at just 50 baht (\$1.47) per month for a 10Mbps connection with unlimited data, 150 baht or less for a 15Mbps connection and 200Mbps or less for a 20Mbps connection.

An initiative of regulator NBTC, construction of the network will be funded as part of the 14 billion baht Universal Service Obligation (USO). It will also involve the construction of 5,229 free Wi-Fi hotspots, as well as 763 public internet centers that will function as community centers for 2-4 villages.

The NBTC has just launched a tender process to select the project's contractor, and plans to hold an online auction to choose a winning bidder in July. Networks must be capable of a minimum 30Mbps connection speed, and the service packages must be offered for at least five years.

The NBTC is also finalizing the details of construction of a broadband network for an additional 15,732 villages, as part of its plan to deploy

a low-cost broadband infrastructure spanning 40,432 underserved villages nationwide to help bridge the digital divide between urban and rural Thailand.

➤ KT, AT&T to explore 5G R&D collaboration

South Korea's KT has revealed plans to team up with US operator AT&T on 5G and SDN/NFV technology development.

Representatives of the two major operators met at the KT R&D Center last week to discuss potential areas of collaboration, BusinessKorea reported.

The collaboration will seek to leverage AT&T's leading role in the development of SDN/NFV technologies and KT's 5G technology development expertise, including its planned Network 3.0 Indigo 5G platform.

Details of the planned collaboration have not yet been disclosed. But the report cites KT Technology Convergence Center director Lee Dong-myeon as stating that the collaboration is expected to "create synergies to solve challenges of the telecom industry in the future."

KT has already been collaborating with US operator Verizon to test the interoperability of their respective network orchestration platforms, under a deal reached earlier in the year. Verizon and KT are also jointly involved in the 5G Open Trial Specification Alliance, along with NTT DoCoMo and SK Telecom.

'COMUS' offers an extensive line of consumer electronics that includes Mobiles, Tablets, Laptops, Cameras and other popular electronic gadgets, featuring every leading brand in the industry.

➤ **HK mobile apps firms face serious talent shortage: Survey**

Facing talent shortage and increased operational costs, nearly half of mobile apps development firms in Hong Kong need to turn down their business deals or outsource services to overseas, according to a recent survey conducted by the Wireless Technology Industry Association (WTIA).

The WTIA's Hong Kong Mobile Apps Industry Survey, conducted by Hong Kong Productivity Council (HKPC), interviewed 124 app development companies firms between May 8 and June 5 this year.

According to the survey, 33% of the companies said they are facing a serious shortage of manpower with technical talents such as programmers, coders and engineers being the most difficult to fill.

"There is a major talent shortage not just on the technical side, but also in sales," said Wendy Alison Yung, executive director at WTIA.

Another key challenge is an increase in operational costs, with a majority (86%) of the companies saying facing increasing pressure from high staff costs while 55% from office rental.

To address the issues of talent shortage and increased operational costs, 42% of the companies said they have to use outsourced services, with domestic companies being the most popular

choice (69%), followed by firms in mainland China (25%) and other countries or regions (21%).

Despite these challenges, the survey found that the mobile app industry in Hong Kong is getting mature with a better business prospect.

For one, the number of respondents with an annual revenue of HK\$500,000 (\$64,000) grew by 28%. At the same time, the number of companies in deficit reduced by 14%. These figures suggest a better business environment and prospects for a growing in the smartphone app industry, Yung said.

Meanwhile, the number of companies operating for six or more years has drastically increased from 22% last year to 50% this year, while startups have also become considerably more well-established with an increase in founders aged 25 and above (23%) and in founders with five or more years of work experience (13%).

Business applications (57%) tops the most popular app products this year followed by e-commerce applications (26%). Over four-fifths (82%) of the respondents allocated resources to R&D and product development in the previous year, with the average amount at over HK\$2.1 million.

Following the global success of the popular augmented reality (AR) game "Pokemon Go" and the introduction of NFC e-payment services in Hong Kong, the survey showed that AR and NFC

According to the survey, 22% of mobile apps created feature AR in 2017, up from 9% the previous year, while adoption of NFC has increased to 21% this year from 10% in 2016.

India's digital economy can reach \$4tr by 2022

India's digital economy has the potential to reach up to \$4 trillion in just four years, according to India's tech firms. This outshines the government's goal of making India a \$1 trillion digital economy by 2022.

IT minister Ravi Shankar Prasad, who chaired a meeting with industry captains to chalk out a growth plan, said the government will formulate a new set of strategies to support growth including a new electronics policy, software product policy and a framework for data security and protection.

"There was unanimity among all the participants that \$1 trillion digital economy is an understatement. India has the immense potential to go to [a] \$2 trillion to \$3 [trillion] to \$4 trillion digital economy," he said.

The meeting was attended by top experts such as Nasscom President R Chandrashekhar, Google India's Rajan Anandan, Wipro's Rishad Premji, Indian Cellular Association national president Pankaj Mohindroo, NIIT chairman Rajendra

Pawar and Hike Messenger CEO Kavin Bharti Mittal, among others.

The government has projected that Indian digital economy will be worth \$1 trillion by 2022, from around \$450 billion at present.

As of now, the Indian telecoms market is estimated to be around \$150 billion, its electronics market is worth around \$100 billion, its IT sector is around \$150 billion, e-commerce \$30-40 billion. The remainder is contributed by the sharing economy such as taxi hailing services, as well as startups.

The Ministry of Electronics and IT has projected that the IT and IT enabled services sector will grow to \$350 billion by 2025, while the electronics sector is poised to touch \$300 billion by the same time.

Telecoms and e-commerce are projected to grow to be worth \$150 billion each, while the sharing economy and digital skilling each presents a further \$30 billion opportunity.

Digital payments, cyber security and Internet of Things -- all of which are expanding rapidly -- are expected to touch \$50 billion, \$35 billion and \$20 billion respectively.

It was also projected that the digital economy will generate 30 million employment opportunities by 2024-25, which is double than the current scenario. The ministry has identified digital payments, Make In India, Start-Up India, Skill India among the key drivers of the digital economy.

Huawei teams with Tableau on big data

Huawei has teamed up with business intelligence and analytics company Tableau Software to provide comprehensive big data services for various industries.

The companies have announced the mutual authentication of Tableau's data visualization software with Huawei's FusionInsight big data platform.

FusionInsight is a converged data processing and service platform integrating the Hadoop ecosystem, a massively parallel processing database and big data cloud services. Tableau's data visualization software can help customers analyze

and share the collected data.

"Tableau is the leading global visual analytics company," Huawei president for IT cloud computing and big data products Ren Zhipeng said.

"Our collaboration with Tableau extends the value to our customers with even more comprehensive and diversified big data solutions, helping them to utilize the value of data effectively, as well as explore new business growth."

Tableau director of product management Robert Green added that the collaboration "aims to enable more people to see and understand their data more easily. Tableau's wide range of technology partners help our customers make the most out of their analytics investments."

Telecom Trading 快訊貿易 wholly owned by **TELECOM TRADING LIMITED**

Company Profile

Telecom Trading Limited is a Hong Kong holding company whose registered offices are located in Kwai Chung. The company specialises in the trading of smartphones. The company directors hail from the United Kingdom and have over twenty-five years' experience of the mobile telecommunications marketplace, the last eighteen of which have been spent in Hong Kong. The company trades all of the major phone brands and is easily able to access the Chinese and South East Asian marketplaces from its Hong Kong headquarters.

"With eighteen years' experience of trading from within the region, we at Telecom Trading believe that an open and equitable approach to trade is the key to any successful business partnership. If your company shares the same philosophy, then we would be delighted to be your mobile phone partner in China and throughout South East Asia."

Richard Ewart, Director

公司介紹

快訊貿易為一間香港控股公司其辦事處位於葵涌。公司主要業務為各大品牌智能手機的貿易。公司董事來自英國，擁有超過25年的移動通訊市場經驗，以香港為最近18年的基地。藉著公司總部位於香港的優勢，可以比較容易接通中國及東南亞地區的市場。

「基於18年來在區內的貿易經驗，我們快訊貿易深信成功的商貿關係是建基於坦誠及公正的合作。如果貴公司的貿易理念與我們一致，我們很樂意成為貴公司在中國及東南亞地區的合作伙伴。」
