China Telecom and Huawei Debut 5G-A Intelligent Ultra Pooling Uplink Technology

At MWC Shanghai 2025, China Telecom and Huawei launched the innovative 5G-A Intelligent Ultra Pooling Uplink technology that offers intelligent orchestration and uplink spectrum decoupling and pooling. Designed to maximize multi-antenna uplink coverage, this technology leverages the distributed user-centric network (UCN) and real-time sharing of time, frequency, radio access technology (RAT), space, and power resources, and introduces AI to build a wireless service bearer network that powers smart wearables, vehicle-to-everything (V2X), and real-time interaction with AI assistants. This marks a breakthrough for 5G-A networks to better support mobile AI.

Enabling 5G-A and AI Convergence

With enhanced device intelligence, data interactions between devices and networks are becoming more frequent and more complex in content, particularly in the uplink transmission of multi-modal data like videos, images, and text. In addition, applications such as real-time voice interaction and embodied AI robot control require low end-to-end network latency. The development of mobile AI services drives networks towards a highly deterministic architecture of ultra-low latency and high uplink.

The Intelligent Ultra Pooling Uplink technology employs AI models to predict signal channel quality in real time, and also uses AI for time-frequency-RAT-space-power coordinated

scheduling, intelligent multi-band selection, RAT decoupling based on service needs, and free uplink scheduling. This improves the uplink capability of 5G networks and optimizes user experience. This innovation allows 5G-A network capabilities to be precisely predicted, reducing latency by over 30%, improving uplink speeds by over 15% and cell-edge user experience by over 15%, all while maximizing network energy efficiency.

Accelerating Experience Monetization and AI Application over High-Speed, Ubiquitous 5G-A Networks

During the launch, Huang Lilian, General Manager of the Co-construction and Sharing Working Group of China

Services

Telecom, noted that merging 5G-A and AI is transforming how humans and machines interact from mere information to emotional exchanges. Remarking on this new technology, Huang believes that it will make multi-modal data interaction a new norm and integrate digital intelligence into network services on top of connectivity.

In recent years, China Telecom and Huawei have worked together to make numerous breakthroughs in the 5G-A field. They have completed continuous deployment of 3CC CA in Shanghai and Guangdong. With 5G-A's Super Uplink feature, they have made Shanghai Baosteel an industry benchmark for smart steel production and created low-altitude application showcases in Jiangsu and Zhejiang provinces. Their low-altitude flight route project in Hangzhou, Zhejiang won a GSMA GLOMO award for innovation.

Huawei's Cao Ming: 5G-A and AI Drive Industry Transformation

During the launch, Cao Ming, Vice President of Huawei and President of Huawei's Wireless Solution, stated that 5G-A is developing at an unprecedented pace and has ushered in the era of mobile AI. Mobile AI elevates efficiency in daily life, work, learning, and enterprise production, all while lowering costs. Through technological innovation, China Telecom and Huawei have implemented Super series technologies, with

Super Uplink powering applications like live streaming, smart transportation, and smart production.

Cao further highlighted that China Telecom and Huawei will remain dedicated to technological innovation. Guided by China Telecom's innovation strategy, they will unlock the full potential of 5G-A and advance towards the goal of intelligent, fast, pervasive, and versatile connectivity. The two companies will also evolve 5G-A standards with global partners through open innovations to breathe new life into wireless networks.

Looking ahead, China Telecom and Huawei will promote the convergence of AI and 5G-A to meet the demands of various applications. Together, they aim to build AI-integrated 5G-A networks that will lead the mobile industry in commercial use and applications.

Launch of the Intelligent Ultra Pooling Uplink technology
MWC Shanghai 2025 will be held from June 18 to June 20 in Shanghai, China. During the event, Huawei will showcase its latest products and solutions in Hall N1 of the Shanghai New International Expo Center (SNIEC).

The commercial adoption of 5G-Advanced is accelerating in 2025. Huawei collaborates with global carriers, industry experts, and opinion leaders to explore how innovations in AI can be used to reshape telecom services, infrastructure, and operations to generate new revenue sources and accelerate the transition towards an intelligent world.

Huawei's latest phone fits two telephoto lenses into one camera

Huawei has just announced the Chinese launch of its Pura 80 flagship phones, and the Ultra comes with a clever trick: a “switchable” dual-lens telephoto camera that allows two different lenses to share the same sensor.

You can see both lenses side-by-side in the largest of the three camera rings on the 80 Ultra’s rear, but they share more than just a housing. Both lenses are attached to the same set of periscopic elements and the same image

sensor, with a movable prism that directs light from the chosen lens. That’s a different approach to the variable telephotos in some Sony Xperia phones, which use a single lens but move parts of the periscopic structure to change the zoom distance.

The Pura 80 Ultra’s two lenses offer 3.7x and 9.4x optical zoom — or 83mm and 212mm if you prefer — which is a wider range than Sony’s take ever managed. The shorter

lens has an $f/2.4$ aperture and Huawei’s spec sheet lists it as a 50-megapixel camera. The other lens is $f/3.6$ and curiously, despite using the same sensor, is listed with a smaller 12.5-megapixel resolution, suggesting that there’s either sensor-cropping or additional pixel-binning going on when using that lens.

Combining the two telephoto lenses isn't just a way of grabbing headlines. Image sensors are among the most expensive components in modern phones, so finding ways to use one sensor for multiple lenses could save costs in the long run. It's also a space saver, even more so by avoiding having two full periscopic systems. That could keep the phone slimmer, but also makes space for better components — the 1/1.28-inch-type sensor used here is larger than most telephotos offer, and possibly enabled by the new design.

Beyond the novel telephoto cameras, the Pura 80 Ultra includes a 50-megapixel main camera with Huawei's returning dynamic aperture design, plus a 40-megapixel ultrawide. A 6.8-inch LTPO OLED display, 5,700mAh battery, and IP68 and 69 ratings round out the flagship spec sheet. It comes with 16GB of RAM and up to 1TB of storage, but Huawei hasn't detailed the chipset that powers it — a secrecy that's become standard in the last few years as it develops its own chips in the wake of US sanctions.

The Ultra has launched alongside three other phones: the Pura 80, 80 Pro, and 80 Pro Plus. All three have similar designs, and even the base model includes a triple rear camera, only slightly smaller 6.6-inch LTPO OLED screen, and 5,600mAh battery. The Pro and Pro Plus are the same size as the Ultra, and share its main camera and ultrawide, but have a single 48-megapixel telephoto each. The only edge the Plus gets is a little extra RAM and support for two types of satellite communications, though every Pura 80 phone can connect to the Beidou satellite system.

All the new Pura phones launch running HarmonyOS 5.1, the latest version of Huawei's operating system, which is no longer based on Android. The 80 Ultra starts at CNY9,999 (around \$1,390), while the Pro models start at CNY 6,500 (around \$900); the regular Pura 80 isn't

on sale yet and doesn't have a price. Last year's Pura 70 series launched internationally a few weeks after its China debut, so we'll have to see if the same will be true this year.

➤ China Unicom Launches eSIM Service for Smartphones

Recently, netizens discovered that China Unicom has quietly rolled out an eSIM activation page for smartphones on its official app and select online channels.

According to the company's guidelines, during the eSIM commercial trial phase, first-time users must visit a China Unicom-owned service center, partner stores are not yet supported, with a valid ID and the device to be activated, or schedule an on-site service appointment. Returning users, however, can complete the process online by resubmitting their identification documents.

Previously, China Unicom pioneered eSIM trials for stand-alone wearable devices and commercially deployed dual-SIM, one number, two devices, eSIM services in some cities. This new eSIM trial for smartphones signals that the technology's application in China is gradually expanding from "secondary devices" to "primary terminals."

➤ The Galaxy Z Fold 7 has me excited for Samsung's Galaxy G Fold tri-fold

After months of leaks built a lot of anticipation, Samsung finally unveiled its vastly improved Galaxy Z Fold 7 last week. I've spent eight days with it, and as I found in our Galaxy Z Fold 7 review, it's the best folding phone for most people despite its shortcomings. Samsung's new folding phone is its best yet, offering radical improvements in design, display, and hinge to create the first folding phone that feels no different from a regular smartphone when folded.

Alongside the Galaxy Z Fold 7, Samsung announced the new Galaxy Z Flip 7, the Flip 7 FE, and the Galaxy Watch 8 range. Yet, the expectation was that Samsung would also pro-

vide a sneak peek, like it did with the Galaxy S25 Edge at the Galaxy S25 launch, of its first product in another category: a Tri-folding phone with dual hinges that is expected to be called the Galaxy G Fold.

The Galaxy Z Fold 7 proves that Samsung can build an excellent thin phone, and this will be necessary to ensure the Galaxy G Fold remains pocketable and ergonomically friendly when folded to a regular smartphone-sized screen.

At 4.2mm thick when unfolded, the Galaxy Z Fold 7 is one of the thinnest folding phones you'll find. At 8.9mm thick when folded, it's virtually imperceptible from a regular smartphone. Yes, there's a camera bump that's necessary to house the 200MP camera, which is better than the same one on the Galaxy S25 Edge, but not as good as the same sensor in the Galaxy S25 Ultra.

For Samsung to make its tri-folding phone appealing, it'll need the Galaxy Z Fold 7 to get even thinner. The only other tri-fold, the Huawei Mate XT Ultimate, measures just 3.9mm thick when unfolded, but the Galaxy Z Fold 7's improvements have convinced me that Samsung can also deliver here.

Another area where the Galaxy G Fold is likely to excel is in software. The Galaxy Z Fold 7 suggests that we could see more experiences optimized for the big screen that have been built in partnership with Google. Android 16 introduces support for native multitasking and is optimized for the big screen, featuring several Gemini features designed specifically with the large screen format in mind.

The larger screens on the Galaxy Z Fold 7 also demonstrate that Samsung can address another key issue: the crease.

Simply put, it's the least perceptible crease I've used on a folding phone, and I've used almost all folding phones released globally. Yes, you can still notice it under specific light reflections, but you see it more than feel it when running your finger over the crease.

By nature of their form factor, tri-folding phones have two creases in the display. The noticeable divot in past Samsung folding phones would make the tri-folding screen feel appalling, but the redesigned titanium hinge and the carbon fiber sheet have convinced me that it won't be a problem.

As I exclusively discovered during an interview with Sam-

sung's VP of smartphone development (embedded above), the company has a very nifty hinge design that is designed to improve how the crease ages over time.

➤ **Gemini on the Galaxy Watch 8 proves watches are made for AI**

It's been a significant month for Samsung, as the company unveiled its new folding phones, the Galaxy Z Fold 7 and Galaxy Z Flip 7, at an event in New York City. At the same time, the company unveiled the new Galaxy Watch 8 and Galaxy Watch 8 Classic, its latest challengers to the Apple Watch Series 10.

The new Galaxy Watch 8 series offers a range of new health features, including an Antioxidant Level check, vascular monitoring during sleep, and, for the first time in a smartwatch, the detection of an ectopic heartbeat.

The Galaxy Watch 8 also features Samsung's One UI Watch 8 interface, built on top of the Wear OS 6 platform. Like Samsung's phones, the Galaxy Watch 8 and Wear OS 6 are focused on AI, particularly Google Gemini.

➤ **Google Pixel 10 Pro colors leak point to less exciting options than Pixel 10**

New images claiming to show the Pixel 10 Pro color options have appeared online, hot on the heels of renders apparently revealing the four color options of the Pixel 10. The images come via Android Headlines, the same source which shared renders of the Pixel 10 colors earlier this week, and appear to show the Pixel 10 Pro and Pixel 10 Pro XL in four colors; Obsidian (black), Porcelain (white), Moonstone (blue-gray), and Jade (green with gold accents). The gold finish from the Pixel 9 Pro (pictured above) appears to be out. If these Pixel 10 Pro colors are accurate, those looking for a vibrant finish (like the Pixel 10 is rumored to have) will be out of luck, as it seems Google is opting for muted tones on its pricier phones. This is a trend we've seen from Google and others – including Apple – in the past, with the louder colors often reserved for the most affordable device(s) of a flagship series, while the Pro series

tends to get a more grown-up palette.

Google's Pixel series of smartphones are one of the most important flagship offerings, going toe-to-toe with Apple's iPhones and Samsung's Galaxy devices. They've become a showcase for Android and Gemini, allowing Google to show the world what its platform and AI can do. While the Pixel phones don't sell in the same volumes as iPhone and Galaxy S handsets, they are an important window into Google's software features, and set the tone for Android devices over the next 12 months.

➤ **China's May Smartphone Shipments Drop 21.8% YoY**

The China Academy of Information and Communications Technology released a report on the domestic smartphone market performance in May 2025, revealing a significant decline in shipments. Last month, smartphone shipments totaled 23.716 million units, down 21.8% year-on-year. Among them, 21.19 million units were 5G-capable devices, marking a 17% decrease and accounting for 89.3% of total shipments.

While the market had maintained modest growth in the first four months of the year with a 3.5% YoY increase, May's sharp contraction dragged the cumulative growth rate into negative territory. From January to May, domestic smartphone shipments reached 118 million units, down 2.8% YoY, including 102 million 5G phones (down 0.1% YoY), representing 86.2% of total shipments.

The decline may be closely linked to reduced new product launches. In May, only 39 new smartphone models were released in China, a 23.5% YoY drop, with just 13 being 5G models—down 55.2% YoY—making up 33.3% of new releases.

In the first five months of 2025, 202 new smartphone models entered the market, up 7.4% YoY, though 5G models fell 11.2% to 95 units, constituting 47% of total new releases.

dong Unicom, in collaboration with ZTE, successfully completed the verification of 5G-A uplink three-carrier aggregation technology in Zhongshan. The test achieved a groundbreaking uplink peak rate of over 1,010 Mbps, setting a new benchmark for China Unicom's uplink capabilities. This milestone marks a significant leap forward in the performance of China Unicom's 5G-A network, injecting fresh momentum into industrial digital transformation.

China Unicom has been advancing its "Intelligent Uplink" technological innovation, leveraging discrete spectrum integration to combine 3.5GHz and 2.1GHz bandwidths into a logically ultra-wide spectrum. This approach not only enhances spectral efficiency but also reduces public resource overhead. The uplink 3CC technology enables efficient multi-band cooperative scheduling. Utilizing ZTE's cutting-edge 5G-A base station equipment and MediaTek's Dimensity platform terminals, the solution successfully addresses the industry's challenge of limited uplink bandwidth. Tests confirmed an uplink peak rate of 1,010 Mbps, significantly boosting both speed and spectrum utilization while ensuring superior coverage and seamless uplink/downlink experiences across all scenarios. This achievement lays a solid technical foundation for the large-scale commercial deployment of 5G-A.

By pushing the limits of uplink speeds, this breakthrough meets the growing demand for high-bandwidth applications such as HD live streaming, real-time large-file uploads, and immersive interactions. Moreover, Guangdong's robust industrial base stands to benefit from 5G-A's enhanced uplink capabilities, enabling real-time 8K ultra-HD video transmission, millisecond-level precision coordination for industrial robots, AR-assisted inspections, drone HD monitoring, and emergency communications. This leading-edge uplink technology will also empower next-generation applications like the metaverse, holographic communication, and industrial internet, providing a robust network foundation for the sustained growth of the digital economy.

China Mobile Invests in Over 500 Upstream and Downstream Enterprises

Recently, at the 2025 China Mobile Industrial Investment and Ecological Cooperation Conference, Yang Jie, Secretary of the Party Leadership Group and Chairman of China Mobile, stated that the company has invested in more than 500 enterprises across the upstream and downstream sectors of the information services industry chain, with a total investment exceeding 200 billion yuan. These investments have effectively contributed to "value creation, ecosystem building, and industrial-investment synergy," continuously fostering and developing new quality productive forces.

On one hand, China Mobile's investments are driving the transformation and upgrading of traditional industries. Through collaborations with its portfolio companies, it has jointly developed benchmark applications in industrial internet, smart energy, smart mining, smart ports, and other sectors, facilitating the digital, networked, intelligent, high-end, green, and low-carbon development of traditional industries. On the other hand, the company is investing in strategic emerging industries and future-oriented sectors, focusing on cutting-edge fields such as artificial intelligence, satellites, low-altitude economy, and quantum computing. Together with its invested enterprises, China Mobile has tackled key technological challenges, achieving a series of groundbreaking scientific and technological outcomes, thereby driving industrial innovation through technological advancement.

In Sichuan, China Mobile has signed strategic cooperation agreements with both the provincial government and the cities of Chengdu and Mianyang. The company has cumulatively invested over 54 billion yuan in the region, establishing a leading data center and a dual-stack intelligent computing center in western China. These efforts fully support the development of digital governance and "Safe Sichuan," injecting intelligence and momentum into the province's economic and social progress.

Yang Jie emphasized that China Mobile will leverage its role as an industry chain leader to drive collaborative growth. By using capital as a bond and innovation as a driving force, the company will work with all partners to build a mutually beneficial and win-win industrial ecosystem.

- ◆ Shutter range: 1/4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Canon PowerShot V1

- ◆ Effective pixels: 22.0 Million CMOS
- ◆ Cooling fan for video recording
- ◆ Zoom range: 18-50 mm eqv
- ◆ Shutter range: 30-1/2000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion LP-E17
- ◆ Storage: SD/SDHC/SDXC (UHS-II) Card
- ◆ Size: 118 x 68 x 53 mm 426g

Panasonic Lumix DC-LX100 II

- ◆ Effective pixels: 17.0 Million 4/3" CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 60-1/4000 sec
- ◆ Aperture range: F1.7-F2.8
- ◆ LCD: 3.0" 1,240,000 dots
- ◆ Battery: Lithium-Ion DMW-BLE9
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 115 x 66 x 64 mm 392g

Leica D-Lux 8

- ◆ Effective pixels: 17.0 Million CMOS
- ◆ Aperture range: F1.7-2.8
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 1800-1/4000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium-Ion DP-DC15
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 130 x 69 x 82 mm 397g

GoPro Hero 13 Black

- ◆ Effective pixels: 27.0 Million CMOS
- ◆ Waterproof down to 10M
- ◆ Interchangeable Wideangle/Macro/ND Lens
- ◆ Hypersmooth 6.0 with Autoboot Stabilization
- ◆ Movie Clips: 5.3K 60fps
- ◆ LCD: 2.27" Touchscreens
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 71.8 x 50.8 x 33.6 mm 121g

DJI Osmo Action 5 Pro

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 20M without a case
- ◆ AI subject tracking & stay centered
- ◆ Shutter range: 30-1/8000 sec
- ◆ Movie Clips: 4K 60fps
- ◆ LCD: 2.5" 285,000 dots
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 70.5 x 44.2 x 32.8 mm 146g

Fujifilm X100 VI

- ◆ Effective pixels: 40.0 Million BSI-CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 35 mm eqv
- ◆ Shutter range: 15-1/4000 sec
- ◆ Movie Clips: 6.2K 30fps
- ◆ LCD: 3.0" 1,620,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD (UHS-I) Card
- ◆ Size: 128 x 75 x 55 mm 521g

OM System Tough TG-7

- ◆ Effective pixels: 16.0 Million BSI-CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 25-100 mm eqv
- ◆ Shutter range: 4-1/2000 sec
- ◆ Movie clips: 4K 30fps
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion LI-92B
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 114 x 66 x 33 mm 330g
