India overtakes China in smartphone exports to the U.S. as manufacturing jumps 240%, report shows

Smartphones assembled in India accounted for 44% of U.S. imports of the devices in the second quarter, a significant jump from just 13% last year.

The share of U.S. smartphone shipments made in China shrank to 25% in the April to June period, from 61% a year earlier.

"The plan for India is moving ahead as fast as we can," said Renauld Anjoran, CEO of Agilian Technology, an electronics manufacturer in China.

India has overtaken China to become the top exporter of smartphones to the U.S., according to research firm Canalys, reflecting the shift in manufacturing supply chain away from Beijing amid tariff-fueled uncertainty.

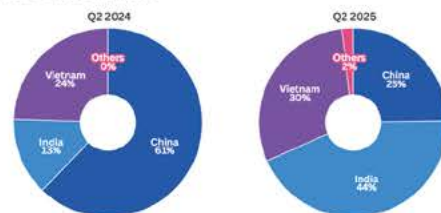

Smartphones assembled in India accounted for 44% of U.S. imports of those devices in the second quarter, a significant increase from just 13% in the same period last year. Total volume of smartphones made in India soared 240% from a year earlier, Canalys said.

In contrast, the share of Chinese smartphone exports to the U.S. shrank to 25% in the quarter ended June, from 61% a year earlier, Canalys data released Monday showed. Vietnam's share of smartphone exports to the U.S. was also higher than that of China at 30%.

The surge in shipments from India was primarily driven by Apple's accelerated shift toward the country at a time of heightened trade uncertainty between the U.S. and China, said Sanyam Chaurasia, principal analyst at Canalys. This is the first time India exported more smartphones to the U.S. than China.

India, Vietnam overtake China in U.S. smartphone manufacturing

% Share of U.S. shipment

Apple has reportedly been speeding up its plans to make most of its iPhones sold in the U.S. at factories in India this year, with the aim of manufacturing around a quarter of

all iPhones in the country in the next few years.

Trump has threatened Apple with additional tariffs and urged the company's CEO Tim Cook to make iPhones domestically, a move experts have said would be nearly impossible as it would push iPhone prices higher.

While many of Apple's core products, including iPhones and Mac laptops, have received exemptions from Trump's "reciprocal tariffs," officials have warned that it could be a temporary reprieve.

Its global peers, Samsung Electronic and Motorola, have also been striving to move assembly for U.S.-bound smartphones to India, though their shift has been significantly slower and is limited in scale compared with Apple, according to Canalys.

Last-mile assembly

Many global manufacturers have been increasingly shifting their final assembly to India, allocating more capacity in the South-Asian nation to serve the U.S. market, said Renaud Anjoran, executive vice president of Agilian Technology, an electronics manufacturer in China.

The Guangdong-based company is now renovating a facility in India with plans to move part of its production to the country. "The plan for India is moving ahead as fast as we can," Anjoran said. The company expects to begin trial production runs soon before ramping up to full-scale

manufacturing.

That said, yield rates — an indicator of manufacturing efficiency — are lower when manufacturing in India and Vietnam, compared with China, Anjoran said, citing quality-related incidents linked to inexperienced workers as well as logistics delays.

While shipments, which represent the number of devices sent to retailers do not reflect final sales, they are a proxy for market demand.

Overall, iPhone shipments to the U.S. declined by 11% year on year to 13.3 million units in the second quarter, reversing the 25.7% growth in the prior quarter, according to Canalys. Globally, iPhone shipments declined 2% from a year earlier to 44.8 million units in the April to June quarter, according to Canalys.

Shares of Apple have tumbled 14% this year, partly on concerns over its high exposure to tariff uncertainty and intensifying competition in smartphones and artificial intelligence sector.

While the company has begun assembling iPhone 16 Pro models in India, it still relies heavily on China's more mature manufacturing infrastructure to meet U.S. demand for the premium model, Canalys said.

In April, Trump imposed a 26% tariff on imports from India, much lower than the triple-digit tariffs on China at the time, before pausing those duties until an Aug 1. deadline.

Motorola Razr 2025 : A large external display, Gemini AI integration, and the iconic design you love

Debuting on April 24 are three Razr flip-style phones: Razr, Razr+, and Razr Ultra. You can think of them as good, better, and best. Motorola claims the Razr Ultra is the most powerful flip-style smartphone with the best camera system available. We'll be the judge of that when we get a device in for review. But the specs—including the latest Qualcomm Snapdragon 8 Elite chipset—at least backs that up on paper.

They all look pretty similar, but here's how you can spot the difference without pulling up a comparison chart. As the most premium model, the Razr Ultra sports the largest internal screen (7 inches) and external screen (4 inches), a dedicated Moto AI button on the left side, and fancier finishes such as Italian-made Alcantara, satin, faux leather, and wood. Upgrades over the other Razrs that you can't eyeball right away: 50 megapixels for the main, ultra-wide, and selfie cameras; a large 4,700mAh battery; 68W wired charging; 30W wireless charging; and 5W reverse wireless charging.

The Razr+ looks nearly identical to the Razr Ultra, but comes with a slightly smaller 6.9-inch internal screen, no physical AI button, a smaller 4,000mAh battery, slower charging (45W wired and 15W wireless), and a lower-resolution selfie camera (32 megapixels). It also has a less powerful Snapdragon 8s Gen 3 chipset.

Sitting at the entry-level, the plainly named Razr has a smaller 3.6-inch external display (there's a "forehead" bezel not present on the Razr+ and Razr Ultra), lower-resolution cameras (50-megapixel main, 13-megapixel ultra-wide, and 32-megapixel

selfie), and a mid-range MediaTek Dimensity 7400X chipset. However, the Razr does have a larger 4,500mAh battery than the Razr+.

I got to play with all three briefly and they all felt well-built to me, with the only major physical quality difference being the materials and finishes. I really liked the luxurious Alcantara on the Razr Ultra, but the polished aluminum and plastic Razr didn't feel cheap in my opinion.

Motorola boasted other quality-of-life upgrades for the new Razrs. The hinges are titanium, which the company says is four

time stronger than before and can handle “up to 35% more folds” compared to previous generation Razr flip phones. Motorola also says the crease on the internal folding display is 30% less visible (unclear how Motorola arrived at that number but it does seem less visible), and the Razr Ultra supposedly has the strongest external screen thanks to it being Corning Gorilla Glass Ceramic. Gadget nerds might be salivating over the specs, especially the ones on the Razr Ultra, but the real appeal to these new flip-style phones might be Moto AI. Rather than develop its own AI—and risk embarrassing itself like a certain fruit-named tech giant—Motorola is partnering up with AI leaders and using their large language models and logic reasoning in the background for various tasks. Perplexity, the AI “answer engine” that’s been chipping away at Google’s search relevance, is deeply integrated into the Android 15 operating system. Google’s Gemini, Meta’s Llama, Microsoft’s Copilot, also power different aspects of Moto AI, assisting with general AI features like tasks suggestions (i.e. calling an Uber on your behalf or drafting an email), summarization, memory recall (think surfacing information from notes and screenshots), and more. Missing is any integration with OpenAI’s ChatGPT (and there’s probably a reason for that) and Anthropic’s Claude.

The cameras also have Moto AI baked in with a feature called

Signature Style. The phones use AI to automatically adjust tone and colors and then learns based on how you edit your shots. It sounds neat, but that also diminishes the whole point of photos which is that they usually don’t have the same uninspired look to them. I want to mix it up with my photos! Not have a specific look.

Fact is, every phone maker is promising game-changing AI features that they’re touting as more convenient or efficient. AI crammed deeper into your phone will help anticipate your needs! AI will save you from hundreds of taps every day. AI will finally fulfill the “intelligent” promises that voice assistants such as Siri, Alexa, and the Google Assistant failed at.

That’s the AI dream everyone (including Motorola) is selling. The AI in these new Razr phones is better and more useful, but also not quite capable enough to fully offload everything to just yet. And who even knows when that’ll be, if that ever happens. (Naturally, Motorola didn’t address AI hallucinations.)

All three Razrs will be available for preorder on May 7 and available unlocked on May 15. The Razr costs US\$699.99, the Razr+ is US\$999.99, and the Razr Ultra is US\$1,299.99.

➤ **China Unicom's First-Half Revenue Exceeds 200 Billion Yuan**

Recently, China Unicom released its interim performance report for 2025. In the first half of the year, the company's operating revenue surpassed 200 billion yuan, marking a year-on-year increase of 1.5%. Profit attributable to equity holders reached 14.48 billion yuan, up 5.0% year-on-year. Basic earnings per share stood at 0.473 yuan, also reflecting a 5.0% year-on-year growth.

During the first half, revenue from connected communications amounted to 131.9 billion yuan, while computing-network-digital intelligence revenue reached 45.4 billion yuan, accounting for 26% of total revenue. International business revenue grew to 6.8 billion yuan, up 11% year-on-year. Revenue from strategic emerging industries rose to 86% of the total, becoming a new driver of the company's high-quality development.

China Unicom stated that it will collaborate with partners to promote integrated innovation across different technology fields, production factors, industry sectors, and application scenarios, jointly creating a new ecosystem that integrates AI infrastructure, AI technology, and AI industries. Looking ahead to the full year, China Unicom will continue to enhance its management, operations, and service levels, with expected fixed-asset investment of approximately 55 billion yuan.

➤ **China Mobile Reports H1 Revenue of 543.8 Billion Yuan**

On August 7, China Mobile released its 2025 interim performance report, showing an operating revenue of 543.8 billion yuan and a net profit attributable to shareholders of 84.2 billion yuan, up 5.0% year-on-year.

The report indicates continuous improvements in China Mobile's new-generation information infrastructure. In the first half of the year, the company's capital expenditure reached 58.4 billion yuan, with the full-year budget set at less than 151.2 billion yuan. The ratio of capital expenditure to revenue continued to decline.

As of the reporting period, China Mobile has deployed over 2.59

million 5G base stations, becoming the first global operator to achieve 100% cloud-integrated core networks. Its RedCap coverage exceeded 732,000 stations, achieving continuous coverage in all county-level regions and above across China. Additionally, the company's gigabit broadband network now serves 500 million households.

➤ **Powerful Android 16 Beta Boost Hits ROG Phone 9 Line**

Highlights:

ROG Phone 9 and 9 Pro users can join the Android 16 Beta via system settings and receive updates OTA.

Android 16 brings gaming optimizations, including lower latency, improved touch response, and enhanced battery efficiency.

ASUS warns that the Beta may have stability issues and is not suitable for primary devices, with a stable release expected in early 2026.

The ROG Phone 9 series will only receive two major upgrades, Android 16 and 17, falling short of the longer update cycles offered by competitors.

ASUS has officially launched the Android 16 Beta testing program for its ROG Phone 9 and ROG Phone 9 Pro models, making it one of the first manufacturers to adopt and test the next-generation Android operating system. The action shows ASUS's commitment to pushing performance boundaries for its flagship gaming devices and gives developers and early adopters the chance to test innovative features before they are made available to the general public.

Android 16 has the primary appeal of enhancements made to its efficiency and performance. In the case of the ROG Phone 9 series, which is made especially for gaming, the update promises a number of noteworthy improvements:

Performance scheduling reduces latency during demanding games by more efficiently allocating system resources.

Better Touch Response, which, in competitive gaming scenarios, allows for faster input detection.

Battery Efficiency with system-level improvements meant to extend playback time without sacrificing functionality.

Thermal Management for better temperature control to preserve the Snapdragon flagship chipset's peak performance.

These enhancements, in turn, will presumably improve the

ROG Phone's defining features of speed, responsiveness, and long-term gaming performance, making Android 16 an essential update for both power users and mobile esports competitors.

➤ **Apple Set to Unleash the Stunning iPhone 17 Series**

With the official keynote event scheduled for September 9 or 10, Apple is getting ready to reveal its eagerly awaited iPhone 17 series in early September 2025. Retail availability is probably going to happen soon after. Four models are anticipated to be part of the next lineup: the iPhone 17, iPhone 17 Air (sometimes called the Slim), iPhone 17 Pro, and iPhone 17 Pro Max. This indicates that Apple's flagship products have significantly diversified.

The iPhone 17 series' design is expected to represent Apple's ongoing emphasis on innovation and minimalism. The iPhone 17 Air, which is only 5.5 mm thick, is anticipated to be the company's thinnest cellphone ever. It has a slimmer frame with a rear camera hump in the middle. A hybrid aluminum-glass back that combines durability and MagSafe charging capabilities may be included in the Pro models.

In terms of design, Apple is prepared to add more colors to its palette. In addition to classic hues like black, white, and green, new tints including Titanium Gray, Desert Titanium Orange, Midnight Blue, and Sky Blue will be available. The goal of these options is to accommodate a greater range of user preferences.

It is anticipated that all models of the iPhone 17 will include LTPO OLED screens with ProMotion technology, which allows for refresh rates of up to 120 Hz. High-refresh screens will be incorporated into Apple's non-Pro devices for the first time. Apple's new A19 Pro chip is expected to power the iPhone 17 Pro and Pro Max, while a normal A19 chip may be used in the iPhone 17 and Air versions.

The standard iPhone 17 may have 8GB of RAM, but the Pro and Air variants have 12GB, which is a significant speed boost. A proprietary 5G modem known as C1 may be included in the Air variant, and Apple is also said to unveil its first in-house Wi-Fi 7 chip.

A key component of Apple's hardware strategy will continue to be photography and videography. Three 48MP rear sensors—wide, ultrawide, and telephoto—with a variable aperture system

and an optical zoom of up to 8x are anticipated to be included in the iPhone 17 Pro variants. The user experience might be further enhanced with a new physical shutter button and a revamped camera app. A 24MP front-facing camera will be included with every model.

Despite being thinner, the iPhone 17 Air is expected to have a single 48MP rear camera, preserving quality in a smaller package.

Performance improvements will be accompanied by improvements to the battery. To lessen thermal throttling, Apple may add vapor chamber cooling to Pro models and enhance AI-based battery management with iOS 26. While wired charging stays at about 35W, wireless charging can reach 25W with Qi 2.2.

However, the ultra-thin Air variant might have a lower battery capacity (2,800mAh), for which Apple might provide a special battery attachment.

➤ **Google Pixel 10 Unleashed: Bold Telephoto & Vibrant Design**

Google has shown a glimpse of the first official renders of the highly anticipated Pixel 10 smartphone ahead of its formal launch on August 20, 2025. Google's increased emphasis on striking a balance between innovation and accessibility in its base model is evident in the Pixel 10's vivid new color palette, unexpected telephoto feature, and updated design.

The Pixel 10's more striking color palette is among the first things that catch the eye. Google is introducing four new hues this time. Obsidian is the traditional glossy black found in earlier Pixel generations. Slightly brighter than Samsung's Blue Shadow on the Galaxy Z Fold 7, Indigo is a beautiful royal blue with a contemporary touch. Frost is a frosty, delicate blue that evokes thoughts of Apple's iPhone 15. A vibrant yellow-green hue that adds a new spark to the lineup is limoncello.

Porcelain, a distinctive neutral tone that has been used on several recent Pixel phones, is conspicuously absent. The removal of this well-known shade suggests a change in Google's design ethos, most likely intending to make the Pixel 10 feel more youthful and fun without sacrificing build quality or elegance.

The camera system, more specifically, the revised camera bar design, has undergone the most significant hardware modifica-

tion. The glass section is now larger and features a triple-lens arrangement, which is a first for a non-Pro Pixel device, even though the camera bar itself retains its recognizable horizontal design.

Verified camera specifications include a 48-megapixel primary camera, a 12MP ultrawide lens, and a Telephoto lens with 10.8MP.

The primary and ultrawide sensors are taken from the Pixel 9a, which is renowned for providing good performance at a reasonable cost. For the first time, optical zoom capabilities are available on the base model, thanks to the telephoto unit taken from the more expensive Pixel 9 Pro Fold.

Google is opting to use smaller sensors in the Pixel 10 than in the Pro models, despite having a third camera. Although this may appear to be a downgrade on paper, Google's computational photography has a history of outperforming competitors with larger sensors thanks to clever software and AI-based image processing.

This approach leverages Google's strengths in delivering flagship-quality images without requiring expensive equipment. In fact, due to these software improvements, the Pixel a-series has consistently outperformed rivals in blind camera testing. Google is placing a wager that the same magic can be achieved with a triple-lens system with the Pixel 10.

While full specs haven't been released, it's expected that the Pixel 10 will ship with Android 15 out of the box and include the latest AI-powered Google features. The updated design remains sleek and minimal, with a matte finish, rounded corners, and a familiar Pixel silhouette.

Honor Play 70 Plus Bold Specs Revealed via TENAA

Honor is preparing to expand its mid-range smartphone lineup with the upcoming Play 70 Plus, recently spotted on the TENAA certification database. This regulatory milestone has revealed key technical specifications, offering a closer look at what consumers can expect. From its sizable display and large battery to generous RAM and storage options, the Play 70 Plus seems to be set to deliver an appealing balance of performance and value.

The Honor Play 70 Plus features a modern and sleek design, measuring 166.89 x 76.8 x 8.29 mm and weighing approximately 207 grams. Its dimensions suggest a robust build that remains reasonably slim for a smartphone with a massive battery. Users who prefer devices that feel substantial yet manageable in hand may appreciate this balance of form and function.

On the front, the device sports a 6.77 inch TFT LCD display with a resolution of 1610 x 720 pixels. While this HD+ panel may not offer Full HD sharpness. It is likely optimized for battery efficiency and cost control. The screen supports 16 million colours, ensuring decent colour reproduction for casual media consumption, social media browsing, and light gaming. Though not as vibrant or sharp as AMOLED panels, the size of the screen makes it suitable for viewing content on the go.

Underneath, the Play 70 Plus is powered by an octa-core processor clocked at 2.3 GHz. Though the chipset's exact model has not been disclosed, it falls within the mid-range category, possibly a MediaTek Helio or lower-tier Dimensity series. This suggests a focus on everyday performance rather than flagship speeds.

Where the Play 70 Plus truly shines is in its memory and storage configurations. It comes in two variants: consisting of RAM of either 8GB or 12 GB capacity and storage of either 256GB or 512GB. These specifications indicate that Honor is targeting users who multitask heavily or store a significant amount of media, documents, and applications. For users seeking a smooth and responsive Android experience, these configurations are more than capable.

In the camera department, the Play 70 Plus is said to carry a primary sensor of 50MP. This camera should perform well in daylight conditions, capturing clear and detailed images. While it lacks the ultrawide or telephoto lenses seen on premium phones, the high-resolution main sensor will likely suffice for casual photography and video recording.

On the front, users will find a 5MP selfie camera. Although modest in megapixel count, it covers basic tasks such as video calling and everyday selfies. The camera app is also expected to include features like facial recognition, HDR, and beauty modes, which are common in Honor's software suite. Overall, the camera offering is serviceable for the price point, prioritizing practicality over versatility.

- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 921,600 dots
- ◆ Battery: Lithium-Ion NP-BX1
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 106 x 60 x 46 mm 256g

Pentax WG-8

- ◆ Effective pixels: 20.0 Million CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 28-140 mm eqv
- ◆ Shutter range: 4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Insta 360 X5

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 15M
- ◆ FlowState Stabilization & 360° Horizon Lock
- ◆ Shutter range: 120-1/8000 sec
- ◆ Movie Clips: 8K 30fps
- ◆ LCD: 2.7" Touchscreen
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 46.0 x 124.5 x 38.2 mm 200g

Ricoh G900 II

- ◆ Effective pixels: 20.0 Million BSI-CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 28-140 mm eqv
- ◆ Shutter range: 1/4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Canon PowerShot V1

- ◆ Effective pixels: 22.0 Million CMOS
- ◆ Cooling fan for video recording
- ◆ Zoom range: 18-50 mm eqv
- ◆ Shutter range: 30-1/2000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion LP-E17
- ◆ Storage: SD/SDHC/SDXC (UHS-II) Card
- ◆ Size: 118 x 68 x 53 mm 426g

Panasonic Lumix DC-LX100 II

- ◆ Effective pixels: 17.0 Million 4/3" CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 60-1/4000 sec
- ◆ Aperture range: F1.7-F2.8
- ◆ LCD: 3.0" 1,240,000 dots
- ◆ Battery: Lithium-Ion DMW-BLE9
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 115 x 66 x 64 mm 392g

Leica D-Lux 8

- ◆ Effective pixels: 17.0 Million CMOS
- ◆ Aperture range: F1.7-2.8
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 1800-1/4000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium-Ion DP-DC15
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 130 x 69 x 82 mm 397g

GoPro Hero 13 Black

- ◆ Effective pixels: 27.0 Million CMOS
- ◆ Waterproof down to 10M
- ◆ Interchangeable Wideangle/Macro/ND Lens
- ◆ Hypersmooth 6.0 with Autoboot Stabilization
- ◆ Movie Clips: 5.3K 60fps
- ◆ LCD: 2.27" Touchscreens
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 71.8 x 50.8 x 33.6 mm 121g

DJI Osmo Action 5 Pro

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 20M without a case
- ◆ AI subject tracking & stay centered
- ◆ Shutter range: 30-1/8000 sec
- ◆ Movie Clips: 4K 60fps
- ◆ LCD: 2.5" 285,000 dots
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 70.5 x 44.2 x 32.8 mm 146g

Fujifilm X100 VI

- ◆ Effective pixels: 40.0 Million BSI-CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 35 mm eqv
- ◆ Shutter range: 15-1/4000 sec
- ◆ Movie Clips: 6.2K 30fps
- ◆ LCD: 3.0" 1,620,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD (UHS-I) Card
- ◆ Size: 128 x 75 x 55 mm 521g

OM System Tough TG-7

- ◆ Effective pixels: 16.0 Million BSI-CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 25-100 mm eqv
- ◆ Shutter range: 4-1/2000 sec
