Apple to Resist Indian Order to Preload State-Run App on Phones

India's move has sparked widespread concerns on state surveillance, with critics, privacy advocates and political opponents saying the app is a way for the Modi government to get access to 730 million smartphones

US tech giant Apple has said it does not plan to comply with a controversial Indian order requiring companies to preload a state-run cyber safety app amid increasing concern the app could become a snooping tool in the world's most populous nation.

India's telecoms ministry privately requested smartphone makers to preload the app, called 'Sanchar Saathi,' on all new devices, in an order dated November 28.

That order, shared later by journalists and activists on social media platforms, showed that the Modi government had given smartphone companies 90 days to ensure that the app is pre-installed on new mobile phones.

The government also wanted phone manufacturers and importers to ensure that the app could not be removed or disabled.

For devices already in the supply chain, it directed manufacturers to push the app to phones via software updates.

India's telecom ministry confirmed the move later, describing it as a security measure to combat "serious endangerment" of cybersecurity. The app is intended to track stolen phones, block them and prevent them from being misused.

Sources have said the government moved forward with the order without consulting the industry.

The move has sparked widespread concerns on state surveillance, with critics, privacy advocates and the Modi

government's political opponents saying the app is a way for the regime to gain access to India's 730 million smartphones.

In the wake of that criticism, India's telecom minister Jyotiraditya M Scindia said on Tuesday the app was a "voluntary and democratic system," adding that users can choose to activate it and can "easily delete it from their phone at any time."

At present, the app can be deleted by users. Scindia did not comment on or clarify the November 28 confidential directive that ordered smartphone makers to start preloading it and ensure "its functionalities are not disabled or restricted."

Apple 'won't comply'

Smartphone-makers such as Apple, Samsung, Vivo, Oppo and Xiaomi are among companies bound by the new order.

But Apple, which has previously locked horns with the telecoms regulator over development of a government anti-spam mobile app, does not plan to comply with the directive.

The iPhone-maker will tell the government it does not follow such mandates anywhere in the world, as they raise a host of privacy and security issues for the company's iOS ecosystem, industry sources familiar with Apple's concerns told Reuters.

"It's not only like taking a sledgehammer. This is like a double-barrel gun," one source said.

HAS GLOBAL

While Apple tightly controls its App Store and proprietary iOS software – which are crucial to its \$100-billion-per-year services business – Google’s Android is open-sourced, allowing manufacturers like Samsung and Xiaomi greater leeway to modify their software.

One source said Apple does not plan to go to court or take a public stand, but will tell the government it cannot follow the order because of security vulnerabilities.

Apple “can’t do this. Period,” the person said.

The app order comes as Apple is locked in a court fight with an Indian watchdog over the nation’s antitrust penalty law. Apple has said it risks facing a fine of up to \$38 billion in the case.

Industry insiders say Apple, which has “historically refused such requests from governments” will likely seek to find some “middle ground with the government.

“Instead of a mandatory pre-install, they might negotiate and ask for an option to nudge users towards installing the app,” Tarun Pathak, a research director at Counterpoint told Reuters.

Other brands, including Samsung, are reviewing the order, according to a fourth industry source who is familiar with the matter. Samsung did not respond to Reuters’ queries.

‘Big Brother cannot watch us’

The order caused a furore both inside and outside Parliament on Tuesday, with a number of lawmakers accusing the government of introducing an app that would act as a snooping tool. Rahul Gandhi, of India’s main opposition Congress Party, said he planned to speak about the app in Parliament.

The Congress Party has called for a rollback of the mandate. On X, KC Venugopal, a top Congress leader, said: “Big Brother cannot watch us.”

Sanchar Saathi — Hindi for ‘Communication Partner’ — is billed as a citizen-centric safety tool on popular app stores.

It allows users to block and track lost or stolen mobile phones using the device’s International Mobile Equipment Identity (IMEI), which is a unique code for each handset.

It also enables users to check how many mobile connections are registered under their name, helping to identify and disconnect fraudulent numbers used in scams.

Additional features include tools to report suspected fraudulent calls and verify the authenticity of used devices before purchase.

But critics say forcing manufacturers to pre-install the app on every phone in the country is a severely disproportionate way to handle cybercrime.

The Indian order “represents a sharp and deeply worrying expansion of executive control over personal digital devices,” India’s Internet Freedom Foundation said in a statement on Tuesday.

“The stated objective of curbing IMEI fraud and improving telecom security is, on its face, a legitimate state aim. But the means chosen are disproportionate, legally fragile, and structurally hostile to user privacy and autonomy,” it added.

The group said on X that it would “fight this direction till it is rescinded.”

App permissions, data collection

One of the world’s largest telephone markets, India has more than 1.2 billion subscribers, and the Modi government claims the app, launched in January, has helped recover more than 700,000 lost phones.

It says the app has been downloaded over 10 million times and the system has helped to block over 4.2 million stolen or lost phones, in addition to terminating more than 30 million fraudulent mobile connections.

The government says the app “does not automatically capture any specific personal information from you without intimation on the application.”

Its privacy policy says users will be asked to share permission for sharing access to cameras, photos and files for iPhones – for select uses.

For Android, users will be asked to share call logs, send messages for registration, make and manage phone calls “to detect mobile numbers in your phone,” as well as grant access to cameras and photos.

Introducing Galaxy Z TriFold: The Shape of What's Next in Mobile Innovation

Galaxy Z TriFold takes premium performance and experience of an ultra phone to the next level by unfolding twice to reveal the most immersive screen on a phone, providing ultimate productivity of mobile workspace and cinematic viewing

Samsung Electronics today announced the launch of Galaxy Z TriFold, further expanding Samsung's leadership in new form factors for the mobile AI era. Built on a decade of foldable category innovation, Galaxy Z TriFold showcases engineering mastery with its most advanced foldable technologies optimized for the unique demands of a multi-folding design. Its slim profile ensures the portability of a premium phone that provides ultra performance and, when unfolded twice, it reveals an immersive 10-inch display that elevates productivity and cinematic viewing — offering a best-in-class mobile experience never before seen in any other form factor. "Samsung's relentless pursuit of new possibilities continues to shape the future of mobile experiences," said TM Roh, Chief Executive Officer, President and Head of Device eXperience (DX) Division at Samsung Electronics. "Through years of innovation in foldable form factors, Galaxy Z TriFold solves one of the mobile industry's longest-standing challenges — delivering the perfect balance between portability, premium performance and productivity all in one device. Galaxy Z TriFold now expands the boundaries of what's possible for mobile work, creativity and connection."

Shaping the Future With Decades of Mobile Expertise

Samsung has long led the mobile industry, pioneering new categories and experiences such as large screen devices, foldable form factors and the use of AI on a mobile device, with each of these innovations created with the user in mind. Backed by state-of-the-art R&D, end-to-end manufacturing and rigorous quality control, Galaxy Z TriFold showcases how Samsung continues to set new benchmarks for a phone that maximizes output while remaining portable.

In Samsung's research and design process, innovation is driven by understanding how people use devices. The company's decade-long experience in foldable category innovation inspired Galaxy Z TriFold's unique multi-folding form factor, which uses an inward-folding design to protect the main display. The folding mechanism has been precisely engineered for easy opening and closing, with an auto-alarm alerting the user of incorrect folding through a series of on-screen alerts and vibrations. Every detail is crafted with precision and purpose to deliver an intuitive, user-friendly experience.

Measuring just 3.9 mm at its thinnest point, Galaxy Z TriFold delivers flagship-level performance powered by the customized Snapdragon® 8 Elite Mobile Platform for Galaxy, a 200 MP camera and the biggest battery Samsung has ever had in a foldable phone. The 5,600 mAh three-cell battery system has been placed in each of 3 panels of the device for balanced power delivery and all-day endurance. Combined with 45 W super-fast charging, Galaxy Z TriFold lets users stream, create and work

without limits.

To balance the power of an ultra-quality device in a thin, portable frame, a re-optimization of the core foldable technology had been applied. Every part of the device was crafted with deep attention to structural innovation and product assurance:

- Samsung's Most Advanced Hinges Yet: Drawing on its heritage in foldable phone innovation, Samsung refined the Armor FlexHinge to meet the unique demands of Galaxy Z TriFold. Two differently sized hinges with a dual-rail structure work in harmony, creating a smoother, more stable fold despite varying weight and components across the device. The hinge structure also allows the screen panels to meet securely with a minimal gap, enabling a thinner, more portable device.
- Restructured Foldable Display: Galaxy Z TriFold introduces new display

technology made for the 10-inch screen that folds twice into a pocketable phone. A reinforced overcoat has been added to a shock-absorbing display layer for better resistance across the dual-folding device.

- **Advanced Materials on the Exterior:** The titanium hinge housing introduces a thin piece of metal that protects the

folding mechanism and resists wear over time. The frame of the device is supported by Advanced Armor Aluminum, a high-strength alloy that adds rigidity without increasing bulk. The frame helps ensure that the screens don't make contact with each other, and a ceramic-glass fiber-reinforced polymer back panel keeps the design thin yet resistant to cracks.

- **High-Quality Inspection, on Each Device:** Every unit goes through a series of strict quality checks to achieve every small requirement. For instance, CT scanning of the flexible printed circuit board verifies that it has been correctly manufactured according to the design, ensuring accuracy and reliability before bonding it together with the other internal display components. Laser scanning verifies that all internal components are mounted precisely at their intended height, securing surface quality.

Through design innovation, engineering excellence and high-quality standards, every device has been built to deliver the best user experience possible.

Samsung's Most Versatile AI Phone, Powered by the Largest Screen

Productivity on Galaxy Z TriFold is heightened with powerful experiences, customized for the 10-inch display — the largest screen ever on a Galaxy phone. Like the users who inspired its dynamic design, Galaxy Z TriFold is powerful, versatile and ready for the modern AI era.

When Galaxy Z TriFold opens, the screen performs similarly to three 6.5-inch smartphones across the 10-inch display, giving users more room to multitask during their day. Users can use the screen with endless versatility — they can create across three different portrait-sized apps side-by-side without interruption, resize apps in multi-window to view the most important information clearly, or hold it in a vertical orientation when reviewing documents for improved focus. For example, an architect drafting design plans for a new home can use the large screen to operate three applications at the same time, to review blueprints, write a proposal, and calculate measurements in a single, multi-window workspace. If a call comes in unexpectedly, they can answer without disrupting their layout or losing their momentum. When it's time to jump back into work, the Taskbar at the bottom right of the display instantly resurfaces recently used apps, bringing the full setup back into view with a single tap. Familiar apps and features, such as My Files and Samsung Health have also been optimized for a large screen, allowing users to organize and understand insights at a glance.

To match the powerful capabilities a screen of this size can provide, Galaxy Z TriFold is the first mobile phone to have standalone Samsung DeX available, meaning users can set up a full working environment from virtually anywhere. By going to the Quick Settings panel and selecting DeX for Galaxy's most advanced work setup, users can access up to four workspaces that can each run five apps simultaneously. From there, they can review and edit a meeting presentation in one workspace and then quickly navigate to another to chat with friends and shop online. For even more productivity, users can add a secondary screen in Extended Mode, which enables a seamless dual-screen experience with an external monitor. Users can easily drag and drop apps across screens and work across both screens with desktop efficiency. Users can also add a Bluetooth mouse and keyboard, instantly creating the ultimate portable workstation for complex projects or creative designs.

Every detail of Galaxy Z TriFold is designed for excellence — and with Galaxy AI, those capabilities elevate the device by making every feature more intuitive on a large screen. Features like Photo Assist, including Generative Edit and Sketch to Image, adapt to Galaxy AI flexibly with impressive scale, enabling users to capture and create with Samsung's most versatile creative platform. Users can also easily compare before and after edits side by side. Browsing Assist can simplify how Samsung Internet is used as it can provide instant summaries or translations as needed.

Gemini Live on Galaxy Z TriFold is enhanced with multimodal AI that understands what users see, say and do. Users can seamlessly speak contextual questions and get answers without having to switch between apps for high level multitasking. The bigger screen provides design advice — when a user shows it a room, a shopping site and paint swatches, it will provide a custom recommendation. With screen or camera sharing on Gemini Live, users can simply ask questions about what they are viewing to get real-time assistance and insights — all on one device.

A Pocket-Sized, Cinematic Viewing Experience

Galaxy Z TriFold's unique form factor unlocks not only increased possibilities for creating and working, but also provides a perfect canvas for high-quality viewing of photo and video content.

Designed for maximum viewing with greater portability, Galaxy Z TriFold's expansive 10-inch main screen is perfect for getting lost in movies or shows. For an extended YouTube experience, users can now watch a video and read the comments side-by-side. Minimized creasing on the device keeps content seamless and uninterrupted, and once closed, its slim profile allows it to easily slide back into any pocket.

Drawing on Samsung's expertise in visual display, the device provides silky-smooth visuals on a Dynamic 2X AMOLED cover screen with a refresh rate of up to 120 Hz. Galaxy Z TriFold features a bright display both opened and closed, with up to 2600 nits on the cover display and 1600 nits on the main screen. With Vision Booster optimizing color and contrast in any lighting, every image and frame comes to life in vivid detail, creating a truly immersive experience.

➤ **Samsung Galaxy S26 Ultra: Upgrades That Finally Fix Charging and Your Privacy Concerns**

The Samsung Galaxy S26 Ultra introduces a range of enhancements designed to elevate your experience in photography, videography, and daily smartphone use. By refining its predecessor's features and addressing user feedback, this flagship device delivers improved performance, versatility, and functionality. With advancements in camera technology, software capabilities, and design, the S26 Ultra aims to set a new benchmark for premium smartphones.

The Galaxy S26 Ultra takes mobile photography to the next level with significant upgrades to its camera system. The 200MP main camera now features a wider f1.4 aperture, allowing brighter and sharper images in low-light conditions. This improvement also enhances the natural background blur effect, giving your photos a professional-quality finish. Additionally, the introduction of a 24MP photo mode strikes a balance between image sharpness, zoom flexibility, and storage efficiency, making it an ideal choice for everyday photography.

Telephoto performance has also been enhanced. The 5x telephoto lens now includes a wider aperture, improving its ability to capture detailed images in dim lighting. However, the 3x telephoto lens uses a smaller sensor, which may slightly impact its low-light performance. On the video front, the inclusion of the APV codec ensures superior recording quality, offering improved stabilization and optimized 8K video capture. These upgrades make it easier than ever to create professional-grade content directly from your smartphone.

Samsung has introduced thoughtful design updates to the Galaxy S26 Ultra, maintaining its sleek and premium aesthetic. The device retains the flat sides and clean lines of its predecessor but transitions from titanium to aluminum,

resulting in a lighter build without compromising durability. A new "cobalt violet" hero color adds a fresh and modern touch to the lineup, which also includes classic shades like white, black, and light sky blue.

The S Pen has also been refined, now featuring black or white bodies with color-matched tips to complement the device's design seamlessly. These subtle yet impactful changes ensure that the S26 Ultra not only looks sophisticated but also feels comfortable and practical in daily use.

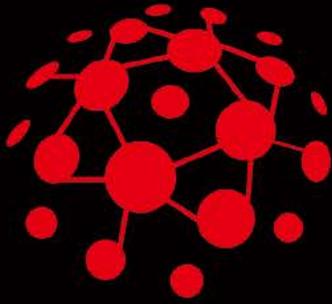

➤ **New iPhone Fold Leaks Suggest a 7.8-Inch 'iPad Mini' in Your Pocket**

Apple is reportedly preparing to unveil its most ambitious smartphone yet—the iPhone Fold. Expected to debut in 2026, this device is anticipated to redefine the foldable smartphone category. By combining innovative design, advanced technology, and seamless integration into Apple's ecosystem, the iPhone Fold could establish a new standard in the industry. For those following the evolution of foldable devices, this release may mark a pivotal moment. The video below from Matt Talks Tech gives us more details on the new iPhone Fold.

The iPhone Fold is rumored to feature a horizontal "book-style" folding mechanism, allowing it to transform into a tablet-like display when unfolded. This larger screen is designed to enhance productivity, entertainment, and multitasking, offering an experience similar to that of an iPad Mini. Whether you're working on documents, streaming videos, or managing multiple apps, the expanded display promises to deliver versatility and convenience.

When folded, the external display remains fully functional, allowing users to perform everyday tasks like messaging, browsing, or checking notifications without needing to open the device. This dual-display approach ensures a balance between portability and functionality, adapting effortlessly to your needs. The design aims to provide a seamless transition between compact usability and immersive experiences, making it suitable for a wide range of scenarios.

One of the most significant challenges in foldable smartphones is the crease that forms along the fold. Apple is

reportedly addressing this issue with an advanced hinge system and innovative display materials. The inner screen is expected to feature a scratch-resistant coating and reinforced protective layers, enhancing durability while maintaining exceptional visual quality.

This focus on reducing the crease and improving screen resilience could give the iPhone Fold a competitive edge. By delivering a smoother and more visually appealing display, Apple aims to elevate the user experience and set its device apart from existing foldable smartphones.

Durability is a critical focus for Apple in the development of the iPhone Fold. The device is rumored to incorporate a reinforced hinge system capable of withstanding years of repeated folding. Additionally, the outer casing and internal components are expected to use stronger, more resilient materials to ensure long-term reliability.

Foldable devices often face concerns about wear and tear, but Apple's approach appears to prioritize longevity. By addressing these challenges, the iPhone Fold could offer the same level of dependability that users have come to expect from traditional iPhones.

The iPhone Fold is expected to feature a camera system comparable to Apple's Pro models, making sure professional-grade photography capabilities. Advanced sensors and computational photography technology will likely enable exceptional image quality in both folded and unfolded modes. Whether capturing wide-angle landscapes, detailed portraits, or low-light scenes, the iPhone Fold is designed to deliver outstanding results.

This emphasis on high-quality photography aligns with Apple's commitment to providing industry-leading camera performance. The foldable format may also introduce new creative possibilities for photography and videography, further enhancing its appeal.

China's Domestic Mobile Phone Shipments Decline by 2.4% Year-on-Year in 2025

Recently, the China Academy of Information and Commu-

nications Technology (CAICT) released the December 2025 domestic mobile phone market analysis report. Data shows that in December 2025, domestic mobile phone shipments reached 24.473 million units, a year-on-year decrease of 29.1%. Among these, 5G phone shipments totaled 22.132 million units, down 27.3% year-on-year, accounting for 90.4% of the total mobile phone shipments during the same period.

From January to December 2025, domestic mobile phone shipments totaled 307 million units, a year-on-year decline of 2.4%. Among these, 5G phone shipments reached 266 million units, down 1.9% year-on-year, representing 86.9% of the total mobile phone shipments during the period.

In terms of new models launched, December 2025 saw 41 new mobile phone models released domestically, a year-on-year increase of 28.1%. Among these, 11 were 5G models, up 37.5% year-on-year, accounting for 26.8% of all new models launched during the same period.

From January to December 2025, a total of 515 new mobile phone models were launched domestically, marking a year-on-year increase of 15.5%. Among these, 234 were 5G models, up 1.3% year-on-year, accounting for 45.4% of all new models launched during the period.

Regarding brand composition, domestic brand mobile phone shipments in December 2025 amounted to 21.24 million units, a year-on-year decrease of 31.0%, accounting for 86.8% of the total shipments during the same period. Domestic brands launched 40 new models, up 37.9% year-on-year, representing 97.6% of all new models launched during the period.

From January to December 2025, domestic brand mobile phone shipments totaled 262 million units, a year-on-year decline of 2.5%, accounting for 85.5% of the total shipments during the period. Domestic brands launched 491 new models, up 17.2% year-on-year, representing 95.3% of all new models launched during the period.

and is predicted to grow with a CAGR of 3.9%, by generating a revenue of \$808.5 million by 2031.

Mobile satellite phone is typically more expensive than traditional cell phones, and the cost of satellite phone services is also higher. Mobile satellite phone has low data bandwidth, large antenna size, and need to have clear line of sight (LOS) to satellite in the sky. Also, the per minute charges of the mobile satellite phone is higher than the cellular phones. These factors are anticipated to limit the mobile satellite phone market share in the future.

The adoption of mobile satellite phones during emergency situations is expected to rise in a number of industries, including construction, tourism, fisheries, mining, and transportation, which is expected to lead to significant growth in the global mobile satellite phone market during the forecast period. During severe weather, natural and man-made disasters, and when existing communication networks are down, satellite phones are typically used. Mobile satellite phones have better geographic networks than landline and cellular phones in addition to the aforementioned factors. These factors are anticipated to propel the global mobile satellite phone market growth during the forecast period.

According to regional analysis, the mobile satellite phone market in North America is experiencing the fastest growth among all the regions, mainly owing to the rapid increase in the demand for satellite communication from the developing countries in this region. Countries such as the U.S., Mexico, and Canada are investing in the development of advanced satellite-based infrastructure capabilities at different locations.

The North America mobile satellite phone market accounted for the highest market share in 2021. Significant investments made by market participants are the primary drivers responsible for the enormous growth of the North America mobile satellite phone market. For instance, the Future Satellite Communications Service Acquisition (FCSA) program in the U.S. awarded the complex commercial satellite communication solution contract (CS3) to SES Government Solutions Inc., a provider of satellite

solutions based in the U.S. These factors will make it possible for the U.S. government to benefit from cutting-edge services like high connectivity for a fleet of multi-orbit satellites. The demand for mobile satellite phone in this region is anticipated to increase during the forecast period due to such initiatives and regional investments by businesses.

Investment and agreement are common strategies followed by major market players operating in the mobile satellite phone market. For instance, in January 2023, Qualcomm Technologies, Inc. announced Snapdragon Satellite — the world's first satellite-based two-way capable messaging solution for premium smartphones. Snapdragon Satellite will provide global connectivity using mobile messaging from around the world, starting with devices based on the flagship Snapdragon 8 Gen 2 Mobile Platform.

➤ **Poco C81 Pro Appears on Thailand's NBTC Certification Database, Might Launch Soon**

Poco C85 5G was released in India towards the end of last year with the MediaTek Dimensity 6300 processor and a 6,000mAh battery. Now, the Xiaomi sub-brand seems to be preparing to expand its C-series lineup with a new model, dubbed Poco C81 Pro. The upcoming smartphone has recently been spotted on Thailand's National Broadcasting and Telecommunications Commission (NBTC) certification website, and the listing reveals its model number and moniker. The appearance on the certification platform indicates that the handset could be inching closer to an official launch.

The upcoming Poco C81 Pro is listed on the NBTC website with model number 25128PC17G and certification number B38077-26. As per the listing, the phone supports GSM, WCDMA and LTE networks, indicating that it lacks 5G connectivity. It is manufactured in China.

It is rumoured to feature a 6.9-inch LCD panel with HD+ resolution and a 120Hz refresh rate. It is speculated to come with HyperOS 3-based Android 15 Go edition. The phone could run on the Unisoc T7250 chipset, alongside 4GB of RAM and up to 128GB of storage. It is tipped to feature a 6,000mAh battery with 15W charging.

- ◆ Storage: SD/SDHC/SDXC (UHS-II) Card
- ◆ Size: 118 x 68 x 53 mm 426g

Panasonic Lumix DC-LX100 II

- ◆ Effective pixels: 17.0 Million 4/3" CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 60-1/4000 sec
- ◆ Aperture range: F1.7-F2.8
- ◆ LCD: 3.0" 1,240,000 dots
- ◆ Battery: Lithium-Ion DMW-BLE9
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 115 x 66 x 64 mm 392g

Leica D-Lux 8

- ◆ Effective pixels: 17.0 Million CMOS
- ◆ Aperture range: F1.7-2.8
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 1800-1/4000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium-Ion DP-DC15
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 130 x 69 x 82 mm 397g

GoPro MAX 2

- ◆ Effective pixels: 1/2.3" sensor x 2
- ◆ Waterproof down to 5M
- ◆ MAX HyperSmooth with 360° Horizon Lock
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Movie Clips: 8K 30fps 360 degree
- ◆ LCD: 1.8" Touchscreen
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 64.0 x 69.7 x 48.7 mm 195g

DJI Osmo Action 5 Pro

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 20M without a case
- ◆ AI subject tracking & stay centered
- ◆ Shutter range: 30-1/8000 sec
- ◆ Movie Clips: 4K 60fps
- ◆ LCD: 2.5" 285,000 dots
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 70.5 x 44.2 x 32.8 mm 146g

Fujifilm X100 VI

- ◆ Effective pixels: 40.0 Million BSI-CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 35 mm eqv
- ◆ Shutter range: 15-1/4000 sec
- ◆ Movie Clips: 6.2K 30fps
- ◆ LCD: 3.0" 1,620,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD (UHS-I) Card
- ◆ Size: 128 x 75 x 55 mm 521g

Fujifilm X half

- ◆ Effective pixels: 18.0 Million BSI-CMOS
- ◆ Built-in 13 film simulation modes
- ◆ Zoom range: 32 mm eqv
- ◆ Shutter range: 900-1/2000 sec
- ◆ Movie Clips: 1080 24fps
- ◆ LCD: 2.4" 920,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 106 x 64 x 30 mm 240g

Dr FONES AI

Dr Fones Ltd is a global leader in mobile device certification and diagnostics. We specialize in delivering innovative, reliable, and efficient solutions for the mobile device industry

We Diagnose iMac, Mac Book, iPhones & Android, Airpods, Apple Watches

Complete Online Checks: MDM, Carrier Lock, Blacklist, iCloud/FRP, Finance check, Warranty & Full Device Report

CONNECT 20+ DEVICES SIMULTANEOUSLY

AUTOMATED 90+ POINT INSPECTION

LOCKS, FINANCIAL ELIGIBILITY & DIAGNOSTICS

PRINT LABELS AND SECURELY ERASE

Diagnostics

Comprehensive diagnostic services to assess the full functionality of devices.

IMEI Checks

Verification of IMEI numbers to ensure the authenticity and status of devices.

Custom Labels

Create customized labels for devices, ensuring easy identification and tracking.

Cloud-Based Inventory

Manage your inventory through a secure cloud platform for easy access and tracking.

OEM Verification

Verification of original equipment manufacturer (OEM) status for all devices.

ADISA Certified Data Wipe

Certified data wiping to ensure complete and secure data removal (ADISA certification).

24/7 Support

Round-the-clock customer support to assist with all your device testing and management needs.

Core Service

Why Choose Dr Fones?

✓ Dr FONES AI Automation

Speed, Precision & Efficiency in Mobile Diagnostics. Test up to 1000+ devices daily with our advanced AI automation, reducing costs and boosting profits.

✓ Top-quality repairs

We guarantee top-quality repairs through thorough testing and certification, ensuring devices are restored to optimal functionality.

✓ Advanced technology

Leverage cutting-edge technology for rapid, precise diagnostics services that ensure accuracy and reliability.

✓ Boost Efficiency

Our swift and reliable solutions enhance business operations, allowing you to process devices quickly and efficiently.

Comprehensive Advertising Package

The Most Effective Media for Promotion and Brand Building

CIC Media as a pioneer trade media of the telecom industry, dedicates in serving as the bridge between suppliers and buyers. "Telecom Worldwide" is the gateway for the international telecom market. It provides insights on the market trend and features the latest telecom products (mainly mobile phones, accessories, spare parts and repair equipments) to the 100,000 buyers in Europe, North & South America Asia, Middle East and other regions.

Finding Business Partners

• Brand Building

With great exposure in many world known trade fairs, mobile forum, seminars and mobile phone trading markets, the publication offers a direct way to promote your products to the oversea buyers.

• Sourcing Channel

With the publication and its website www.MobileSources.net, Buyers keep abreast of the right sources and first hand information on brand new phones, operator stocks, used refurbished phones, original accessories and spare parts which facilitate the flow of trade.

• Boost OEM order

Apart from the advantages on building your brands and increasing brand awareness, CIC also helps in boosting your revenues by promoting manufacturers' OEM services to the oversea buyers by various means.

MobileSources.net – borderless 24/7 online promotion

For over 25 years experience in publication, CIC has proactively launched a sourcing website to enhance the interactivity and timely information to the buyers.

Mobile phone database: comprehensive specifications and photos for easy reference.

Phone Mart: post and view instantly your trade leads on buy/ sell/ stock offers.

E-magazine: Monthly updated version of "Telecom Worldwide".

Auto-Matching: CIC auto matching bridges buyers with the suppliers by the products they are looking for.

Buyers' Information: buyers' contacts from worldwide exhibition, mobile phone trading market and online enquiry are viewable online.

FOR ADVERTISING, PLEASE CONTACT:

Tel: +852-2398 8576

E-mail: info@mobilesources.net

Tactful Circulation to Reach the Right Buyers

With over 26 year experiences in the mobile phone industry, CIC has established a strong network and up-to-date database in the mobile phone business through aggressive participation at many international trade, 5G events and ITU seminars.

Hundreds thousand of buyers from all over the world source from CIC website, magazines. Its effective advertising helps in saving customers big money and time cost from exhibition and hence, achieving the greatest efficiency!

Mobile Forum and Professional Conference

"Telecom Worldwide" have presented in many international world known events, including CES, ITU Telecom World, Mobile Conference Barcelona, Los Angeles and Shanghai, Gitex Technology Week, Convergence India, which are organized by the most influential organization of the industry such as Consumer Technology Association, ITU World, GSM Association etc.
