Removable batteries in smartphones will be mandatory starting in 2027

Starting in 2027, there will be a noticeable change for smartphones in the EU: The removable battery is making a comeback. What used to be standard is returning due to legal requirements for new models.

What exactly can we expect?

Starting February 18, 2027, new smartphones and tablets must be designed so that end users can remove and replace the battery themselves using standard tools. Adhesive bonds that require heat to be removed will then be largely prohibited.

Specifically, this means the following for new models starting in February 2027:

- Easy replacement: Batteries must be replaceable using standard tools (e.g., screwdrivers).
- No barriers: The use of adhesives that can only be removed with heat or solvents is prohibited.
- Tools: If a special tool is required for replacement, the manufacturer must provide it free of charge.
- Spare parts guarantee: Replacement batteries must be available to end users at a reasonable price for at least 5 years.

Why is the EU introducing this?

The main driver is the transition to a true circular economy. Currently, smartphones are often replaced as soon as battery

performance declines, which wastes enormous amounts of resources.

- Waste prevention: Millions of tons of electronic waste are generated in the EU every year. Easily replaceable batteries significantly extend the lifespan of devices.
- Cost savings: Many users shy away from expensive repairs or buying new devices. The EU estimates that consumers could save tens of billions of euros in total by 2030 thanks to longer usage cycles.
- Resource conservation: Batteries contain valuable raw materials such as lithium and cobalt. If they are easily removable, they can be sorted by type and recycled more efficiently.
- Fire safety: Batteries that are permanently glued in place are often damaged during shredding, which repeatedly leads to dangerous fires in sorting facilities. Clean removal significantly increases safety in the recycling process.

What does this mean for users?

- DIY repairs: Instead of paying a lot of money to visit a repair service, you simply buy the replacement part and swap it out yourself.
- Higher resale value: Used cell phones can be resold much more easily and for a higher price with a brand-new battery.
- Longer software support: Since the hardware lasts longer,

there is also increased pressure on manufacturers to offer security updates for a longer period.

Will this make smartphones thicker or less waterproof?

That is the key challenge for designers.

- Modern devices are often bonded together to make them particularly thin and waterproof.

- Removable batteries make this design more difficult, but not impossible.

Manufacturers are already working on solutions, such as:

- new seals instead of adhesive,
- more robust casings with screw mechanisms,
- modular internal structures.

Many users fear that cell phones will break immediately if they get wet in the rain or fall into water. That's not true: It is entirely feasible to make smartphones waterproof despite having a removable battery. The principle is similar to that of rugged outdoor phones. A rubber gasket running around the battery cover, which is pressed into place by screws or a secure clip, ensures that the interior of the housing is sealed.

It is therefore quite possible that smartphones will become slightly thicker, but significant increases are unlikely, as design remains a key selling point.

Are there any exceptions to the replacement requirement?

Yes, but only in specific cases:

- Specialized hardware: Devices used in highly specialized fields (e.g., medical diagnostics or explosion-proof industrial cell phones) are also exempt if a replaceable battery would

compromise safety.

- Extremely long lifespan: To avoid the replacement requirement, a battery would have to be extremely durable. The battery must retain at least 80% of its original capacity after 1,000 charge cycles. That is significantly more than many batteries on the market today can achieve (often around 500–800 cycles).

- Simultaneous water protection: In addition to durability, the device must be water- and dust-tight according to IP67.

Another innovation: the “battery passport”

In addition, the EU is introducing a digital battery passport.

Users and recycling facilities can access important data via a printed QR code. It stores information about the battery's carbon footprint, the proportion of recycled materials, its chemical composition, and its “state of health.” This represents a huge step forward, particularly for the second-hand market and professional recyclers.

Conclusion

The new EU regulation marks the end of the “disposable” era for smartphones. Starting in 2027, users will benefit from longer device lifespans, easier repairs, and lower costs.

Even though manufacturers will have to adapt their designs to improve water resistance and aesthetics, the benefits for the environment and consumers –including less electronic waste and greater transparency – outweigh these changes.

MULTII NEWHEIGHTS GROUP F Z C O

Multii Newheights Group FZCO, headquartered in Dubai, is a leading global sourcing and distribution company specializing in telecommunication and electronic products. With over a decade of expertise in own brands, white labelling, and diverse product distribution, we serve global corporates with trust and reliability.

Our strength lies in the sourcing and distribution of branded Mobile Phones, SDA, IT products, and OEMs, supported by a strong supply chain network across key international hubs.

Apple introduces iPhone 17e

Apple has announced iPhone 17e, a powerful and more affordable addition to the iPhone 17 lineup. At the heart of iPhone 17e is the latest-generation A19, which delivers exceptional performance for everything users do. iPhone 17e also features C1X, the latest-generation cellular modem designed by Apple, which is up to 2x faster than C1 in iPhone 16e. The 48MP Fusion camera captures stunning photos, including next-generation portraits, and 4K Dolby Vision video. It also enables an optical-quality 2x Telephoto — like having two cameras in one. The 6.1-inch Super Retina XDR display features Ceramic Shield 2, offering 3x better scratch resistance than the previous generation and reduced glare. With MagSafe, users can enjoy fast wireless charging and access to a vast ecosystem of accessories like chargers and cases.

Available in three elegant colors with a premium matte finish — black, white, and a beautiful new soft pink — iPhone 17e will be available for pre-order beginning Wednesday, March 4, with availability starting Wednesday, March 11. iPhone 17e will start at 256GB of storage for HK\$5,099 — 2x the entry storage from the previous generation at the same starting price, and 4x more than iPhone 12 — giving users more space for high-resolution photos, 4K videos, apps, games, and more.

"iPhone 17e combines powerful performance and features our users love at an exceptional value, making it a compelling option for customers looking to upgrade to the iPhone 17 family," said Kaiann Drance, Apple's vice president of Worldwide iPhone Product Marketing. "We know our customers want a product that will last, and iPhone 17e delivers just that. With A19 for incredible performance, double the entry storage, a smarter camera system, and enhanced durability, iPhone 17e is designed to stay fast, secure, and valuable for years to come."

A Beautiful Design with Enhanced Durability

iPhone holds its value longer than other smartphones, and iPhone 17e is built to last. It features a strong yet lightweight aerospace-grade aluminum design, and is splash, water, and dust resistant with an IP68 rating. The Ceramic Shield 2 front cover — featured across the iPhone 17 family — is tougher than any smartphone glass, and an Apple-designed coating provides 3x better scratch resistance than the previous generation as well as improved anti-reflection to reduce glare.

The Super Retina XDR display with OLED technology delivers a fantastic viewing experience whether a user is streaming videos in Dolby Vision or playing games, and with up to 1200 nits peak HDR brightness, it is easy to view content on brighter days. Face ID provides a seamless and secure way to unlock iPhone 17e, authenticate purchases, sign in to apps, and more. With the Action button, users can access their favorite features — like the flashlight, visual intelligence, and more — with just a press.

Powerful Performance and Exceptional Efficiency

advanced 3-nanometer technology, delivering powerful performance. The faster, more efficient 6-core CPU — up to 2x faster than iPhone 11 — handles everything from simple tasks like scrolling through photos to advanced Apple Intelligence capabilities like Clean Up. The 4-core GPU with Neural Accelerators unlocks console-level gaming on the go, supporting demanding AAA titles and hardware-accelerated ray tracing for more realistic lighting and reflections. The upgraded 16-core Neural Engine is optimized for large generative models and, combined with Neural Accelerators built into each GPU, enables Apple Intelligence and other AI models to run faster than on the previous generation.

iPhone 17e also features C1X, the latest-generation cellular modem designed by Apple. C1X is up to 2x faster than C1 in iPhone 16e and matches the speed of iPhone Air. C1X uses 30 percent less energy than the modem in iPhone 16 Pro, contributing to the exceptional all-day battery life.

Excellent Battery Life, Fast Charging, and MagSafe

iPhone 17e delivers exceptional all-day battery life, enabled by the efficiencies of Apple silicon, including the C1X cellular modem, and the advanced power management of iOS 26. With fast wired charging using USB-C, iPhone 17e can charge up to 50 percent in around 30 minutes. iPhone 17e also supports MagSafe and Qi2 for fast wireless charging up to 15W compared to 7.5W Qi wireless charging on iPhone 16e. MagSafe chargers, stands, cases, wallets, camera accessories, and more snap easily to the back of iPhone 17e, providing seamless alignment with a wide ecosystem of accessories.

An Advanced Camera System to Capture Everyday Moments

iPhone 17e takes gorgeous photos with excellent detail, including in low light with Night mode. The 48MP Fusion camera enables an optical-quality 2x Telephoto, giving users two cameras in one so they can get closer to the subject and easily frame their shot. Users can shoot sharp photos at up to 48MP resolution, or capture in the 24MP default for incredible image quality at a file size perfect

for storing and sharing. Portrait mode improves thanks to an advanced image pipeline, delivering remarkably natural depth and smooth bokeh that gracefully blurs the background while keeping subjects sharp.

iPhone 17e takes stunning videos with the ability to record in 4K with Dolby Vision up to 60 fps. iPhone 17e also records video in Spatial Audio for immersive listening with AirPods or Apple Vision Pro, and enables more ways to edit video sound with Audio Mix. With wind noise reduction, powerful machine learning algorithms automatically reduce unwanted noise for better audio quality.

iOS 26 and Apple Intelligence

iPhone 17e comes with iOS 26, delivering a beautiful new design, powerful Apple Intelligence capabilities, and meaningful improvements to the apps users rely on every day. The new design with Liquid Glass makes apps and system experiences more expressive and delightful, bringing greater focus to content while keeping iOS instantly familiar and introducing even more ways to personalize iPhone. Apple Intelligence allows users to communicate across languages with Live Translation in Messages, FaceTime, Phone, and with AirPods. Visual intelligence now extends to a user's iPhone screen, letting them search, ask questions, and take action on the content they're viewing. To help users eliminate distractions, Call Screening can screen calls from unknown numbers and automatically ask the reason for calling, while Hold Assist can hold on the line until a live agent is available. In Messages, users can now choose to screen messages from unknown senders by filtering them to a dedicated folder so they don't clutter up the conversation list.

購買翻新機

Buying a refurbished phones

購買翻新手機

智能手機價格昂貴，但使用數年後，效能基本上都會逐漸下降。應用程式可能運行緩慢，甚至停止更新；即使手機外觀仍然良好，使用體驗也可能變得不理想。因此，越來越多人選擇購買翻新手機。翻新手機價格較低，而且經過檢測，品質通常可以得到一定保障。

甚麼是翻新手機？

翻新手機通常是消費者因改變購買決定而退回的產品，或者是曾經出現輕微故障的手機。這些手機會經過檢查，並在有需要時進行維修或修復，使其重新達到正常運作狀態。

翻新手機通常不會附有原裝包裝，也可能不會提供新手機原本配備的所有配件，例如充電器或耳機。不過，大部分翻新手機都會附帶一年保養，但購買前務必確認具體保養期限及相關條款。

零售商通常會為翻新手機評定不同等級。不過，Trading Standards 曾指出，這些等級並沒有統一的獨立標準，因此不同商家的定義可能有所不同，實際品質也會存在差異。一般而言，各個等級通常定義如下：

Grade A (有時稱為 Pristine 或 Like New) : 通常是消費者退回的手機，或曾因輕微缺陷退回、之後已完成維修的產品。整體狀態非常接近全新產品，適合希望獲得較高使用保障的消費者。

Grade B (有時稱為 Very Good) : 手機可能有輕微使用痕跡，例如螢幕或機身上存在少量外觀瑕疵。整體外觀和手感通常仍然接近全新。

Grade C (有時稱為 Good) : 手機通常會有較明顯的使用痕跡，例如螢幕或機身上可以看到刮痕。雖然能夠看出手機屬於翻新產品，但這類手機通常可以帶來最大的價格節省。

不同等級的價格會有所不同。以目前一部已解鎖的 Samsung Galaxy S25 為例，該機於 2025 年推出，Pristine 等級的翻新機售價約為 £409，而全新機售價約為 £799。

保養條款非常重要

購買翻新手機時，保養是最重要的考慮因素之一。萬一手機日後出現故障，保養可以為消費者提供保障。幾乎所有翻新手機都會附帶保養，期限通常為一年，但具體時長以及提供保養的機構可能有所不同，因此購買前一定要仔細確認。

保養通常由負責翻新的公司提供。如果翻新工作由手機製造商負責，出現問題時，消費者可以直接聯絡該製造商處理。如果保養由零售商提供，則需要由銷售手機的零售商負責跟進維修或更換事宜。

直接向製造商購買是否更好？

雖然直接向製造商購買翻新手機，相比購買全新機仍然可以節省不少費用，但價格通常會高於專業翻新手機平台提供的產品。

Apple

Apple 銷售翻新 iPhone，同時也提供翻新 iPad、Apple Watch 和 Mac。所有翻新 iPhone 均配備全新電池和全新外殼，並享有一年保養、免費配送及退貨服務。此外，產品還包括：

完整的功能測試；如有需要，會使用 genuine Apple parts 進行更換，並經過徹底清潔。

配備原有的作業系統，或已更新至較新的系統版本。

所有翻新裝置都會重新包裝在全新的包裝盒內，並附帶所有配件和連接線。

Samsung

Samsung 銷售 Certified Pre-Owned 手機，提供多款手機型號，並附帶一年保養。消費者也可以直接透過網絡營辦商購買合約翻新 Samsung 手機，但這類產品的性價比通常並不高。

購買翻新機

Buying a refurbished phones

Buying a refurbished mobile

Smartphones are expensive, but after a few years they basically just stop working well. Apps get slow or stop updating and even if the phone still looks fine, it starts to feel unusable. So people try to buy the refurbished phones, they are less expensive and the quality are guaranteed.

What is a refurbished mobile phone?

Refurbished phones are usually just those that were sent back by customers who changed their minds, or because they had a minor fault – they'll have been checked and, if necessary, restored to full working order.

They won't generally come with the original packaging and may not include all the accessories that a new phone would, such as chargers or headphones, but usually come with a one-year warranty (but do check).

Refurbished phones are typically given a 'grade' by retailers. Trading Standards has told us these grades aren't set independently, so quality can and will vary, but typically they are defined as follows:

- Grade A (sometimes called 'Pristine' or 'Like New') – these are usually customer returns or phones that have been sent back due to minor defects that are fixed. As close to a new phone that you can get if you want that peace of mind.
- Grade B (sometimes called 'Very Good') – the phone has 'light' signs of use which might mean some small cosmetic imperfection(s), be it on the screen or the body of the phone itself. It'll usually look and feel almost new.
- Grade C (sometimes called 'Good') – the phone will tend to have 'moderate' sign of use which will mean you'll visibly see scratches on the screen or body. Although you'll be able to tell it's refurbished, you'll usually save the most money.

Prices vary depending on which grade you opt for and right now, for an unlocked Samsung Galaxy S25 (released 2025), you could expect to pay £409 for a Pristine model (vs £799 new).

The warranty is key

One of the most important considerations when buying a refurb is the warranty it comes with, as this provides your protection if it develops a fault. Almost all refurbs come with one, and while they are typically for one year, the length and who provides it varies, so always check before buying.

Whoever did the refurbishment will usually provide it – if that's the manufacturer, you can go to it directly if there's a problem. If the warranty is provided by a retailer, then that's who you'll be dealing with.

What about going direct to the manufacturer?

While you'll make a considerable saving versus buying new, it's generally more expensive to buy refurbs direct, rather than through a specialist site.

Apple

Apple sells refurbished iPhones, as well as refurbished iPads, Apple Watches and Macs. All refurbished iPhone models come with a new battery (so no worries about battery health), new outer shell, are backed by a one-year warranty, have free delivery and returns, and also include:

- Full functional testing, genuine Apple part replacements (if necessary) and a thorough cleaning
- The original operating system or a more recent version
- All refurbished devices are repackaged in a brand-new box with all accessories and cables

Samsung

Samsung sells 'Certified Pre-Owned' phones with a range of handsets with a one-year warranty. You can get refurbished Samsung handsets on contract directly from the networks, but they don't tend to be great value.

➤ **Samsung forecast to overtake Apple in global smartphone shipments in 2026: report**

Samsung Electronics is forecast to reclaim the top spot in the global smartphone market this year, overtaking U.S. rival Apple, an industry report showed Monday.

Samsung's smartphone shipments are expected to rise about 0.8 percent from a year earlier, according to Counterpoint Research. Apple's shipments are expected to decline 2.1 percent this year.

Samsung's relatively strong performance is attributed to its broad product portfolio, geographically diversified business presence, in-house component sourcing capabilities, and robust carrier and distribution networks, which have helped strengthen its competitiveness amid supply chain uncertainties, the report said.

On the other hand, Apple is facing potential price hikes for the iPhone 18 series phones as well as changes in the launch schedules for individual models.

In addition, Apple is only expected to unveil its first foldable iPhone in the third quarter of this year, with initial shipments projected to be only a few million units, making it unlikely to significantly alter the overall shipment trends in 2026, the latest findings said.

➤ **SmarTone to Shut Down 3G Network in Hong Kong This October**

SmarTone will permanently discontinue its 3G mobile services on October 9, 2026, as the operator accelerates its transition toward more advanced mobile technologies.

The company said the move will allow it to further strengthen its 5G network, citing the continued decline in 3G usage among its subscribers. As of June 2026, only

around 1% of SmarTone's total mobile customer base remained on its 3G network.

To ensure a smooth migration, SmarTone said it has been notifying affected customers since last year, encouraging them to upgrade their mobile devices and SIM cards before the network is switched off.

The latest shutdown follows SmarTone's retirement of its 2G network in 2022, reflecting the broader industry trend of phasing out legacy mobile technologies.

Founded in 1992, SmarTone is a subsidiary of Hong Kong-based Sun Hung Kai Properties. The operator previously maintained a presence in Macau before exiting the market in 2024.

SmarTone joins other Hong Kong operators in retiring legacy networks. China Mobile Hong Kong (CMHK) completed its 3G shutdown in 2025 as operators across the territory continue to modernize their infrastructure.

Globally, telecom operators are decommissioning 2G and 3G networks to reallocate valuable spectrum for 4G LTE and 5G services, enabling greater network capacity, improved efficiency, and support for growing mobile data demand.

➤ **Indonesia Mobile Data Growth Drives Telecom Market Expansion**

Indonesia's mobile services market is projected to grow at a compound annual growth rate (CAGR) of approximately 3.4%, rising from USD 10.2 billion in 2025 to USD 12.1 billion by 2030. This growth is primarily driven by increasing revenue from mobile data services, which helps counterbalance the ongoing decline in mobile voice and messaging revenues, according to GlobalData.

In their Indonesia Mobile Services Forecast (Q1-2026), GlobalData indicates that revenue from mobile voice services is expected to decrease during the forecast period.

This decline is attributed to a steady reduction in mobile voice ARPU as users increasingly turn to OTT communication platforms, while operators include free voice minutes in their plans. Conversely, mobile data service revenue is anticipated to grow at a CAGR of 4.8% from 2025 to 2030, fueled by rising mobile internet subscriptions and the growing adoption of higher-ARPU 5G services. The demand for data services is further strengthened by cross-border travelers, business users, and high data consumption in urban areas, highlighting a market shift towards data-driven monetization.

Sarwat Zeeshan, Telecom Analyst at GlobalData, stated:

"The average monthly data usage over mobile networks is forecast to increase from 20 GB in 2025 to 30.3 GB in 2030, in line with the surge in consumption of online video and social media content on mobile networks, on the back of 5G network expansions and promotional data-centric plans offered by MNOs."

While 4G is expected to continue leading in mobile technology subscriptions in 2025, its share of total subscriptions is predicted to decline as users transition to faster 5G services. The number of 5G subscriptions in Indonesia is set to rise significantly, thanks to the wider availability of reasonably priced 5G-enabled smartphones and the increasing range of premium data plans for high-bandwidth applications. The Indonesian government aims to enhance 5G network coverage to over 30% by the end of 2030.

In 2025, Telkomsel will lead the Indonesian mobile services market in terms of subscriptions and is expected to maintain this dominance throughout the forecast period, owing to its extensive 4G coverage and aggressive expansion of its 5G infrastructure. The company achieved over 97% population coverage with 4G by March 2026 and has deployed over 2,500 5G base stations across 56 cities as of mid-2025. Telkomsel is also heavily investing in its "Hyper 5G" strategy, launching high-speed, low-latency 5G services in key regions like Batam, Denpasar, and Badung,

while also implementing AI-powered autonomous networks to enhance service efficiency and customer satisfaction.

Zeeshan concluded:

"Indonesia's consumer mobile market will continue to evolve around rising mobile data consumption, accelerated 5G migration, and increasing demand for high-speed digital experiences. As users shift toward video streaming, social media, and data-intensive applications, operators will focus on expanding 4G/5G coverage and introducing segmented data plans to drive adoption and monetization. At the same time, wider availability of affordable 5G devices, premium connectivity offerings, and enhanced digital services will play a key role in strengthening customer engagement and supporting long-term mobile market growth."

➤ Huawei to hold the line as memory price surge hits China's smartphone makers: report

As higher memory prices raise costs for China's handset makers, a research firm predicted Huawei would be the only domestic brand to increase shipments.

Chinese smartphone makers are preparing for their most challenging year since the Covid-19 pandemic, as analysts say skyrocketing memory chip prices are forcing brands to make a difficult choice: absorb the higher costs, raise retail prices or downgrade storage configurations.

In a report published on Monday, market research firm Counterpoint projected that global smartphone shipments would plunge nearly 14 per cent this year to about 1.08 billion units – the industry's lowest volume since 2013.

The sharp contraction was being driven by the dual blow of soaring memory costs and sluggish consumer demand for replacement handsets.

However, market pressure is likely to hit vendors unevenly, Counterpoint said. Apple and Samsung Electronics are expected to weather the downturn best, shielded by stronger pricing power and premium-heavy product portfolios.

Meanwhile, Chinese Android-based brands, led by Xiao-

mi, face a harsher profit crunch because of their thinner hardware margins and heavier reliance on price-sensitive segments.

Other Chinese Android vendors, including Oppo, Vivo and Transsion, are also expected to face pressure as higher component costs weigh on their price-sensitive product lines and overseas emerging-market sales.

➤ **Xiaomi launches new Xring chip, partners with TSMC for production, sources say**

Chinese smartphone maker Xiaomi unveiled a new version of its in-house Xring smartphone processor, betting that deeper control over key components will help strengthen its supply chain and reduce reliance on external chip suppliers.

The introduction of Xring O3 comes a year after Xiaomi launched its first proprietary smartphone processor, the Xring O1, marking the latest step in the world's third-largest smartphone vendor's push to join rivals such as Apple, Samsung Electronics and Huawei in developing its own chips.

TSMC will manufacture the new chip using its 3-nanometre production technology, two people familiar with the matter said.

One of the sources said the chip is expected to power Xiaomi's upcoming flagship folding phone, with a shipment target of 200,000 to 300,000 units.

The people declined to be identified because the plans are not public. Xiaomi and TSMC did not immediately respond to requests for comment on the chip's manufacturer, production technology or shipment targets.

Smartphone processors, or system-on-chips (SoC), integrate computing, graphics, AI processing and imaging functions into a single component.

Xiaomi's chip push reflects a broader industry trend as device makers seek to differentiate products and lessen dependence on suppliers such as Qualcomm and MediaTek

amid intensifying competition in premium smartphones.

Xiaomi said during an earnings call last week that cumulative shipments of devices powered by the Xring O1, including smartphones, tablets and watches, had surpassed 1 million units since its launch.

Xiaomi has sold about 150,000 smartphones based on the Xring O1 chip since its May 2025 launch, according to the sources.

➤ **The latest Samsung folding phones and watches, including new Z Fold 8 to rival Apple**

Samsung now offers three Galaxy folding phones, with the Z Fold 8 expected to go head to head with Apple's inaugural folding iPhone.

Samsung has revamped its foldable phone line-up, introducing a new entertainment-focused model that will compete with Apple's imminent entry into the market.

The South Korean technology giant is now offering three models: the US\$1,200 Galaxy Z Flip 8, US\$1,900 Z Fold 8 and US\$2,100 Z Fold 8 Ultra.

While the company has kept its long-running foldable design on the high-end Ultra model, the mid-tier Fold 8 – the version aimed at most consumers – has a shorter and wider style that is more ideal for watching video, reading books and gaming.

By launching in late July, Samsung is getting a head start on Apple, which in September is expected to unveil a similar passport-style design for the inaugural folding iPhone.

Phones of this shape have already been released by Chinese phone makers like Huawei Technologies. The original Pixel Fold from Alphabet's Google also looked similar. But between Samsung and Apple, the trend is about to receive a huge US marketing push.

All of the new Samsung hardware is now available to pre-order, with shipments beginning August 7. Here is what consumers can expect

- ◆ Zoom range: 28-140 mm eqv
- ◆ Shutter range: 4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Insta 360 X5

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 15M
- ◆ FlowState Stabilization & 360° Horizon Lock
- ◆ Shutter range: 120-1/8000 sec
- ◆ Movie Clips: 8K 30fps
- ◆ LCD: 2.7" Touchscreen
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 46.0 x 124.5 x 38.2 mm 200g

Ricoh G900 II

- ◆ Effective pixels: 20.0 Million BSI-CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 28-140 mm eqv
- ◆ Shutter range: 1/4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Canon PowerShot V1

- ◆ Effective pixels: 22.0 Million CMOS
- ◆ Cooling fan for video recording
- ◆ Zoom range: 18-50 mm eqv
- ◆ Shutter range: 30-1/2000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion LP-E17
- ◆ Storage: SD/SDHC/SDXC (UHS-II) Card
- ◆ Size: 118 x 68 x 53 mm 426g

Leica Q3 Monochrome

- ◆ Effective pixels: 60.0 Million CMOS with no colour filter
- ◆ Aperture range: F1.7-F16
- ◆ Zoom range: 28 mm eqv
- ◆ Shutter range: 120-1/2000 sec
- ◆ Movie Clips: 8K 30fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium-Ion BP-SCL6
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 130 x 80 x 93 mm 743g

DJI Osmo Action 6

- ◆ Effective pixels: 1/1.1" 38.0 Million CMOS
- ◆ Waterproof down to 20M without case
- ◆ Variable Aperture F2.0-F4.0
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Movie Clips: 8K 30fps
- ◆ LCD: 2.5" 285,000 dots
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 72.8 x 47.2 x 33.1 mm 195g

Panasonic L10

- ◆ Effective pixels: 20.0 Million 4/3" CMOS
- ◆ Aperture range: F1.7-F2.8
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 60-1/2000 sec
- ◆ Movie Clips: 5.2K 30fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium-Ion DMW-BLK22
- ◆ Storage: SD/SDHC/SDXC (UHS-II) Card
- ◆ Size: 127 x 74 x 67 mm 508g

Ricoh GR IV Monochrome

- ◆ Effective pixels: 26.0 Million CMOS
- ◆ Built-in red filter
- ◆ Zoom range: 28 mm eqv
- ◆ Shutter range: 30-1/4000 sec
- ◆ Movie Clips: 1920x1080 60 fps
- ◆ LCD: 3.0" Touchscreen
- ◆ Battery: Lithium-Ion DB-120
- ◆ Storage: micro SD (UHS-I) Card
- ◆ Size: 109 x 61 x 33 mm 262g

Fujifilm X100 VI

- ◆ Effective pixels: 40.0 Million BSI-CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 35 mm eqv
- ◆ Shutter range: 15-1/4000 sec
- ◆ Movie Clips: 6.2K 30fps
- ◆ LCD: 3.0" 1,620,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD (UHS-I) Card
- ◆ Size: 128 x 75 x 55 mm 521g

Fujifilm X half

- ◆ Effective pixels: 18.0 Million BSI-CMOS
- ◆ Built-in 13 film simulation modes
- ◆ Zoom range: 32 mm eqv
- ◆ Shutter range: 900-1/2000 sec
- ◆ Movie Clips: 1080 24fps
- ◆ LCD: 2.4" 920,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 106 x 64 x 30 mm 240g

Dr FONES AI

Dr Fones Ltd is a global leader in mobile device certification and diagnostics. We specialize in delivering innovative, reliable, and efficient solutions for the mobile device industry

We Diagnose iMac, Mac Book, iPhones & Android, Airpods, Apple Watches

Complete Online Checks: MDM, Carrier Lock, Blacklist, iCloud/FRP, Finance check, Warranty & Full Device Report

CONNECT 20+ DEVICES
SIMULTANEOUSLY

AUTOMATED 90+
POINT INSPECTION

LOCKS, FINANCIAL
ELIGIBILITY & DIAGNOSTICS

PRINT LABELS AND
SECURELY ERASE

Diagnostics

Comprehensive diagnostic services to assess the full functionality of devices.

IMEI Checks

Verification of IMEI numbers to ensure the authenticity and status of devices.

Custom Labels

Create customized labels for devices, ensuring easy identification and tracking.

Cloud-Based Inventory

Manage your inventory through a secure cloud platform for easy access and tracking.

OEM Verification

Verification of original equipment manufacturer (OEM) status for all devices.

ADISA Certified Data Wipe

Certified data wiping to ensure complete and secure data removal (ADISA certification).

24/7 Support

Round-the-clock customer support to assist with all your device testing and management needs.

GLOBAL PRESENCE

OUR BRANCHES IN:

DRFONES LTD - UK

DRFONES LLC - USA

DRFONES FZCO - UAE

DRFONES LTD - IRELAND

Core Service

Why Choose Dr Fones?

✓ Dr FONES AI Automation

Speed, Precision & Efficiency in Mobile Diagnostics. Test up to 1000+ devices daily with our advanced AI automation, reducing costs and boosting profits.

✓ Top-quality repairs

We guarantee top-quality repairs through thorough testing and certification, ensuring devices are restored to optimal functionality.

✓ Advanced technology

Leverage cutting-edge technology for rapid, precise diagnostics services that ensure accuracy and reliability.

✓ Boost Efficiency

Our swift and reliable solutions enhance business operations, allowing you to process devices quickly and efficiently.
