China's premium smartphone race heats up with Apple foldable phone debut

Apple unveiled its first foldable iPhone on Wednesday, marking the biggest change to the device's physical design since its debut and bringing the US technology giant into a premium smartphone segment where Chinese brands have spent years refining products, supply chains and software ecosystems.

The launch comes amid a flurry of new foldable releases in China, with Huawei and Xiaomi unveiling new flagship models just two days earlier, further intensifying competition at the premium end of the Chinese smartphone market.

Huawei on Monday launched the Mate XT2, its latest tri-fold flagship, starting at 19,999 yuan ($2,980), while Xiaomi unveiled the Xiaomi 18 Fold the same day, priced from 10,999 yuan.

Apple's arrival could broaden the foldable market, but in China it is entering a mature field where domestic brands already hold an edge in product development, supply chains and ecosystem adaptation, analysts said, noting that how the competition plays out remains to be seen.

The iPhone Duo was the centerpiece of the company's annual fall event. The book-style device features a roughly 5.4-inch outer display and a 7.6-inch inner screen when unfolded. Apple also introduced the iPhone 18 Pro and Pro Max, a new generation of Apple Watch and updated AirPods at the event.

This year's fall event was led by new CEO John Ternus and marked what Reuters described as the most notable overhaul of Apple's flagship product since the iPhone X in 2017.

In the Chinese mainland, the iPhone Duo starts at 15,999 yuan for the 256GB version, making it the highest-priced entry model in Apple's current iPhone lineup. Pre-orders will begin on October 16, with sales starting on October 23, according to Apple's website.

The launch quickly generated debate on Chinese social media, with discussions ranging from its price and under-display camera to the visibility of the screen crease and the durability of its folding mechanism.

Foldables have become a key battleground in the premium smartphone market, with major brands including Samsung, Huawei, Xiaomi, OPPO, vivo, Honor

and Motorola entering the segment as advances in hinges, displays, glass and chips improve product maturity.

Xiang Ligang, director-general of the Beijing-based Information Consumption Alliance, told the Global Times on Thursday that Apple's brand strength and large existing user base could help attract more consumers to foldable devices and further energize the market.

But as a latecomer, Apple still has to prove the quality, technological maturity and day-to-day usability of its first-generation product, Xiang said, adding that the high price would also test consumers' willingness to pay.

"The bigger impact of Apple's entry may be to expand the category, using its ecosystem, developer support and brand appeal to push foldables beyond the premium Android niche and closer to becoming a mainstream choice in the high-end smartphone market," Chen Jing, vice president and research fellow at the Society for the Study of Technological and Strategic Trends, told the Global Times.

That test may be particularly demanding in China, where domestic manufacturers have already gone through multiple generations of foldable devices, analysts said. Huawei has built a particularly strong position, while OPPO, vivo, Xiaomi and Honor have also developed competitive products.

IDC data showed that Huawei held about 60 percent of China's foldable smartphone market in the first quarter of 2026. Apple's entry, alongside rising demand for wider book-style foldables from Samsung and Huawei, is expected to inject fresh momentum into the segment, with global shipments forecast by Counterpoint Research to grow 37 percent year-on-year in 2027.

Apple's foldable could push Chinese brands such as Huawei, Xiaomi and Honor to further improve software, yields and costs. However, broader sales may still take time to scale, as price, weight, battery life and durability continue to weigh on mainstream adoption, Chen noted.

Xiang said that years of iteration are especially important for foldables, noting that unlike software issues, which can often be fixed through updates, hardware problems require repeated testing and refinement. "Chinese manufacturers have accumulated years of experience in engineering, supply-chain coordination and mass production, giving them an edge in industrial maturity," he added.

That progress has also been underpinned by a rapidly developing domestic component ecosystem. Chinese suppliers have expanded their presence in flexible OLED displays, cover glass, hinges, structural parts and other key components used in foldable devices, helping support faster product iteration and lower manufacturing costs.

Apple's move into foldables could also create new opportunities across the wider smartphone supply chain, including for Chinese component makers with years of experience in key foldable technologies, analysts noted.

The outcome of the competition will ultimately depend on clear advances in areas such as reliability, durability, crease control, weight, battery life, large-screen productivity, yields and costs, Chen said.

"Apple has an edge in ecosystem consistency, while Chinese brands may improve hardware faster and gain market acceptance sooner. But foldables still need time to reach a true inflection point and are not yet a major threat to conventional flagships," he noted.

Sony Launches Xperia 10 VIII with a Focus on Improving Everyday Ease of Use

Brighter Display, Enhanced Stereo Speakers and Quick Access to Payment and Reward Apps

Sony is introducing Xperia 10 VIII, a 10 Series smartphone designed with ease of use in mind. Key product features include a screen that is approximately 50% brighter than the previous model for improved visibility even outdoors, enhanced stereo speakers that deliver clearer and more powerful sound with improved overall volume and stronger bass, and quick access to payment and rewards services with "Rewards & Pay" menu", which enables quick access to frequently used payment and rewards apps by a quick double press of the power button.

The device also offers up to two days of battery life, a long-life battery design so you can keep your Xperia for even longer, and lightweight everyday usability.

Pricing and Availability:

Xperia 10 VIII will be available to purchase in a choice of three colours: Frozen White, Frosted Grey and Misty Lilac for €599/£549 and a launch offer will be available from mid to late September 2026. Pricing, launch offers and availability may vary by country and region, please check your local Sony website for more information.

Key Product Features in Detail

Brighter Display for Improved Outdoor Visibility

The display is approximately 50% brighter than the previous model, helping users view the screen more easily outdoors. The device also automatically adjusts colours according to ambient brightness, supporting

clear viewing and comfortable operation in everyday situations such as using maps outside during the day.

Enhanced Stereo Speakers for More Powerful Sound

An upgraded speaker system and revised tuning of the front stereo speakers deliver improved volume and sound quality. The overall volume is approximately 15% higher than the previous model, with the bass more than 30% stronger, enabling users to enjoy videos and music with clearer, more powerful sound.

Quick Access to Payment and Rewards Apps with "Rewards & Pay menu"

By pressing the power button twice, users can quickly launch frequently used apps such as payment and retail reward schemes. This one-handed shortcut helps make everyday transactions smoother, especially when you are in a hurry.

Up to Two Days of Battery Life and Reliable Everyday Performance

A large-capacity battery provides up to two days of use, while the long-life battery design helps maintain performance even after four years. The device also combines 8GB RAM with up to 6GB of virtual RAM for faster and smoother switching between apps.

Lightweight look, Translucent Design

Based on the design concept of a translucent layer, the rear panel uses a transparent material with a matte clear coating. The result is a lightweight look and a simple, refined finish for everyday use with three colours, Frozen White, Frosted Grey and Misty Lilac.

Optional Xperia 10 VIII Cover Designed to Match the Device

The optional style cover for Xperia 10 VIII includes a built-in stand that supports both portrait and landscape positioning for comfortable video viewing. It is designed to let the natural beauty of your smartphone shine through.

China's Second-Hand Smartphone Market: Trends and Opportunities

China's smartphone market is entering a more mature phase. New-device shipments are under pressure, while recycling, trade-in, and resale are becoming more professional. For used-device businesses, this creates a stronger need for fast, consistent, and transparent processing.

In 2025, smartphone shipments in China reached approximately 284 million units, down 0.6% year over year. The decline continued in 2026: IDC reported about 134 million shipments in the first half of the year, 4.2% fewer than a year earlier. Yet slower new-device sales do not eliminate secondary-market opportunities. Replaced phones still move into trade-in, recycling, wholesale, refurbishment, and resale channels.

China's second-hand smartphone market is becoming more structured around professional recycling, trade-in, standardized inspection, B2B distribution, and resale. Online platforms and physical trading hubs increasingly work together. As the market professionalizes, accurate diagnostics, grading, data erasure, pricing, and traceability become more important for protecting margins and buyer confidence.

How Is China's Smartphone Market Changing?

China remains one of the world's largest smartphone markets, but growth can no longer be taken for granted. In Q2 2026, shipments fell to around 66 million units, down 4.3% year over year and marking the fifth consecutive quarter of annual decline. Higher memory and component costs have also put pressure on manufacturers and consumers.

For the secondary market, this can create demand for high-quality used and refurbished devices. A consumer who delays buying a new phone may consider a refurbished flagship, while every completed upgrade can release another device into trade-in, recycling, wholesale, or resale channels.

How Are Government Programs Affecting Replacement?

China's 2026 consumer program supports purchases of eligible digital products. Consumers buying smartphones, tablets, smartwatches or wristbands, and smart glasses priced at no more than RMB 6,000 can receive a subsidy equal to 15% of the final purchase price, up to RMB 500 per product category.

This is not a mandatory smartphone trade-in program: consumers do not have to return an old phone to receive the subsidy. Even so, incentives that encourage upgrades can increase the number of devices entering secondary channels. In 2025, China's Ministry of Commerce reported more than 91 million subsidized purchases of mobile phones and other eligible digital products, illustrating the scale at which replacement incentives can influence the wider device lifecycle.

From Resale to Professional Device Processing

China's second-hand phone market includes C2C sales, independent merchants, electronics markets, recycling companies, online marketplaces, wholesalers, and professional refurbishers. These models increasingly overlap. A device may move from a consumer to a recycling or trade-in company, then through inspection, grading, pricing, B2B distribution, refurbishment, and resale.

ATRenew illustrates the scale of organized secondary commerce. The company reported 41.7 million consumer products transacted through its marketplaces and other distribution channels in 2025, compared with 35.3 million in 2024. In Q2 2026 alone, it reported 11.6 million products transacted. These figures are not limited to smartphones, but they show how large professional resale ecosystems have become.

Online and Offline Channels Are Converging

Online marketplaces provide broader inventory visibility, easier price comparison, and access to buyers beyond a local area. But

physical trading remains important. Huaqiangbei in Shenzhen continues to be a major electronics hub, and in March 2025 ATRenew opened a flagship location there for its Paijitang B2B platform with nearly 10,000 professionally inspected smartphones.

ATRenew has stated that Paijitang provides transaction services to more than 850,000 small and medium-sized businesses across China. The market is therefore not simply moving from offline to online. Digital inventory, standardized inspection, warehouses, physical stores, and local trading networks increasingly operate as parts of one ecosystem.

Why Standardized Device Processing Matters

A used smartphone's value depends on more than model and storage capacity. Battery condition, display and camera performance, microphones, speakers, sensors, biometrics, connectivity, replaced parts, cosmetic condition, and device locks can all affect resale value.

At higher volumes, manual inspection becomes harder to keep consistent. Different employees may test devices differently, defects may be missed during busy shifts, and cosmetic grades may vary. In B2B transactions, where buyers may purchase dozens or hundreds of devices based on supplier data, these inconsistencies can lead to incorrect pricing, unnecessary repairs, lower margins, returns, or disputes.

A standardized workflow connects the key stages of processing: intake, identification, diagnostics, cosmetic grading, data erasure, pricing, inventory, and resale. Each stage provides information needed for the next commercial decision. Diagnostics can affect repair and pricing; grading influences resale category; and data erasure confirms whether the device is ready to change ownership.

How Automation Fits Into China's Used-Device Market

As volumes grow, the competitive advantage shifts from simply acquiring inventory to processing it efficiently and consistently. China's 2026 policy direction also supports stronger recycling networks, more standardized second-hand markets, and improved systems for used-goods evaluation and appraisal.

Frequently Asked Questions

Is the second-hand smartphone market growing in China?

China has a large and increasingly professional secondary electronics ecosystem built around recycling, trade-in, marketplaces, wholesalers, and resale. Public data from large platforms such as ATRenew show growing transaction volumes, although there is no single figure representing the entire used-smartphone market.

How do government smartphone subsidies affect the second-hand market?

China's digital-product subsidies can encourage device replacement. They do not require consumers to trade in an existing phone, but more upgrades can create additional supply for resale, recycling, and trade-in channels.

Why is standardized diagnostics important for used phones?

The value of a used smartphone depends on its actual functional and cosmetic condition. Standardized testing helps businesses make more consistent decisions about acquisition price, repair, grading, and resale.

China's Secondary Smartphone Market Is Becoming an Operations Business

China's secondary mobile market is becoming more organized. Online marketplaces continue to expand, physical trading remains relevant, and recycling and trade-in networks are becoming more structured. For used-device businesses, access to inventory still matters, but so does the ability to turn that inventory into accurately tested, graded, securely erased, correctly priced devices ready for resale.

鴻圖道一號
Hung To Road No.1

香港觀塘鴻圖道 1 號，近年被外界形容為二手手機及電子貨品的集散地之一。由於大廈內聚集了不少手機批發、電子產品貿易及相關服務商戶，來自本地、內地以至海外的買家都會到場尋找貨源，因此逐漸形成一個以二手手機、翻新機、零件及電子產品買賣為主的商業網絡。

No.1 Hung To Road in Kwun Tong, Hong Kong, that has recently been described by outside observers as one of the hubs for used mobile phones and electronic goods. Because the building houses many wholesalers of mobile phones, electronics traders, and related service providers, buyers from Hong Kong, mainland China, and overseas come here to source goods. As a result, it has gradually formed a business network centered on the trading of used phones, refurbished phones, parts, and electronic products.

Global Smartphone Shipments Hit a New Low with 20% YoY Decline, Lowest in 14 Years as Continued Memory Constraints Tighten Supply

Global smartphone shipments declined 20% YoY in Q3 2026, the lowest Q3 level since 2012, according to preliminary estimates from Counterpoint Research's Market Monitor service. The market decline was close to Counterpoint's expectations, as relentless increases in DRAM and NAND prices intensified memory cost shock in Q3. This sharply inflated BOM (Bill of Materials) costs and deepened supply shortages, significantly disrupting OEM shipments. In response, OEMs passed on higher component costs to consumers, driving up global smartphone retail prices by 20% so far in 2026 and further increasing market Average Selling Price (ASPs).

Commenting on the global smartphone market, Senior Analyst Shilpi Jain said, "Q3 was the second successive quarter to take the full brunt of the memory crisis. The extreme memory shortage is pushing the smartphone market into a more selective phase, reshaping OEM strategies and even consumer behavior. Consumers are holding on to their devices longer than estimated, increasingly considering refurbished devices and prioritizing higher-value devices, while OEMs are adjusting portfolios, pricing, and market strategies to protect profitability. This is creating greater pressure across the mass market, while premium demand remains comparatively resilient, widening the gap between premium and price-sensitive segments."

Samsung retained its top position in Q3 2026, with shipments declining 3% YoY while its market share increased to 23%, the largest share gain among major OEMs. The company's focus on higher ASPs and revenue growth supported stronger value growth despite lower shipment volumes, with premiumization and its strong foldable launch contributing to the mix. The Galaxy Z Fold8 series saw robust initial demand, while stable component supply supported the mid-range A series in emerging markets as some Chinese brands reduced their presence.

Apple's market share crossed 20% for the first time in any Q3, reaching 22%, despite a YoY decline in shipments. The volume decline was largely driven by the absence of a base iPhone 18, which resulted in a smaller launch-month channel fill than the full iPhone 17 lineup a year earlier. Apple also joined the industry wide shift toward price hikes, although the impact was limited to the final weeks of the quarter. However, the iPhone 18 Pro models saw a stronger launch than their predecessors, particularly in China and India, while sustained momentum from the iPhone 17 series helped offset a higher shipment decline.

Xiaomi also recorded a significant shipment decline in Q3 2026, with its market share falling to 12%. The company reduced exposure to lower price segments and non-core overseas markets, while raising ASPs and tightening shipment plans to avoid selling devices at uneconomical margins amid ongoing memory crises. However, Xiaomi continues to strengthen its presence in China's upper midrange and premium segments, with the Xiaomi 18 series and foldable models receiving a positive response. Its in-house XRING O3 chipset further supported differentiation in the premium segment.

(Xiaomi's market share has been revised from 10% to 12%)

OPPO and vivo recorded shipment declines of more than 20% YoY, with their market share falling to 9% and 8%, respectively. Both brands raised prices across their entry and mid-range portfolios in response to higher memory costs. OPPO consolidated its portfolio and operations across OPPO, realme, and OnePlus to reduce overlap and improve cost efficiency, while also prioritizing margins by shifting supply from thinner-margin segments to higher-return markets and mod-

els.

vivo is prioritizing its core India and China markets, strengthening its Y series to capture value-conscious consumers while expanding its premium X, V and S series. However, price hikes pushed budget models out of key price bands, while stock shortages further constrained shipments.

The outlook for the remainder of 2026 remains challenging, with OEMs increasingly prioritizing profitability over shipment volumes amid elevated component costs and weaker affordability. Production cuts, tighter portfolios, and greater focus on premium devices are likely to continue, while price-sensitive segments face further pressure from higher device prices and limited availability of components. A meaningful recovery in overall volumes is unlikely until component costs and supply conditions improve.

The iPhone Duo Might Secretly Be a Pretty Great Handheld Gaming Device

Apple's device includes a 5.4-inch outer display and opens to reveal a much roomier 7.6-inch screen—the largest Apple has ever placed on an iPhone. It runs on the company's new A20 Pro chip and supports multiple apps at once. Apple Pencil input and layouts are designed specifically for the folding display, which is a pretty neat feature.

According to Apple, the Duo can provide up to 31 hours of video playback using the inner screen. If you want to use the outer screen, you'll get up to 44 hours of battery. You can expect up to 24 hours of battery when using both.

Again, the Duo starts at $1,999, making it Apple's most expensive iPhone yet. It also puts it firmly in "please don't drop that" territory. Don't go caseless with this bad boy, especially if you plan on playing games with it.

Verizon and Ericsson claim world's first outdoor 6G field call

It is described as a pre-standard proof-of-concept demonstration as opposed to a commercial 6G service launch – which would have been a surprise to say the least – in that it is concerned with putting early stage 6G tech currently under development through the ringer before official standards are finalised.

Ericsson 6G proof-of-concept kit was deployed at Verizon's commercial site in Concord, California and used for test validation, which the release says moves "6G from lab integration into a real-world environment where performance can be assessed both outdoors and as signals move from outside in through buildings."

The base station was installed separately in the site shelter, while the user equipment was in a small house on wheels that supports stationary outdoor and indoor radio configurations. It has varied wall and window materials to enable differentiated testing of indoor coverage using a pre-standard 6G stack with a 400 MHz carrier, we're told, and there are some pictures of it below.

What occurred was an indoor penetration test as well as an outdoor call, the intention being to examine how 6G performance carries from open air into indoor spaces. Things they were putting under the microspore included coverage, throughput, latency, stability and feature behaviour "under realistic conditions", including line-of-sight and non-line-of-sight paths, foliage, obstacles and outside-in penetration through different glass and building materials.

"Over time, 6G is expected to bring more programmable, responsive and context-aware connectivity, potentially enabling new experiences and use cases across immersive communications, AI-native services, industrial automation and robotics," states the release.

The two firms intend to continue analysing field results and applying what comes out of that to future 6G research, testing, and deployment planning.

"As a founding member of the Verizon 6G Innovation Forum, Ericsson plays a vital role in our shared mission to build

For more information, please check our website : www.MobileSources.net

an open, diversified ecosystem and move 6G from theoretical research into practical, real-world reality," said Yago Tenorio, Chief Technology Officer and SVP of Technology Development at Verizon.

"This outdoor 6G milestone demonstrates how close industry collaboration helps us generate the key technical insights needed to shape global standards and understand how future 6G networks could be designed, deployed and experienced."

Hannes Ekström, Head of Customer Unit Verizon at Ericsson added: "Today's announcement is another validation of Verizon's leadership on the path to 6G. These are the field learnings that can help turn the promise of 6G into deployable technology and, over time, unlock new possibilities for highly responsive, intelligent and immersive connectivity."

Huawei and Qualcomm get pally over patents

There was a time when owning technology patents seemed to be as much about generating bargaining chips for commercial negotiations, or even litigation, as anything else. But two of the biggest telecoms patent providers, Huawei and Qualcomm, have today announced a multi-year, reciprocal broad patent license agreement, allowing them both to get on with using those patents to make new stuff.

Superficially, the main element of this deal would appear to be 5G, with Qualcomm the leading 5G modem maker and Huawei keen to establish itself as a world class chipmaker on top of its already strong positions across the telecoms ecosystem. But, while it's not explicitly acknowledged in the press releases, the really juicy bit could be Qualcomm access to Huawei's novel semiconductor manufacturing technology.

A month ago Huawei launched a new foldy phone that uses a chip manufactured using a novel technique it unveiled earlier in the year. Known as 'LogicFolding' its real significance is as a proposed alternative to the dominant cutting edge chip tech that relies on equipment supplied by Dutch firm ASML to work. The US has persuaded ASML not to sell such kit into China, making such an alternative of extreme strategic importance.

Bloomberg reports that patents for LogicFolding are indeed part of this patent exchange which suggests Qualcomm, which knows a thing or two about making chips, thinks it's the real deal. Furthermore, Last week Huawei announced its smartphone SoC made using the LogicFolding method – the Kirin 9050 – is also powering its regular (non-foldy) flagship phone, suggesting confidence it can be made at high volume.

"Huawei's broad contributions to the 4G/5G standards, such as the near-physical-limit signal transmission technology using polar codes, have established Huawei's leadership in the mobile communications industry, and continuously transformed the way people communicate and live," said Alan Fan, Huawei's Chief Intellectual Property Officer. "This agreement not only demonstrates the value of Huawei's innovations, but also recognizes Qualcomm's foundational contributions to modern communication technologies."

"This agreement reaffirms industry recognition of Qualcomm's 5G technology leadership and the success of Qualcomm's 5G SEP licensing program," said John Han, GM of Qualcomm Technology Licensing. "This agreement likewise reflects Qualcomm's recognition of Huawei's continued innovation and intellectual property in 5G and other technology fields."

Amusingly, the near-identical Qualcomm press release put Han before Fan in the order of quotes. It just makes sense for major patent holders to strike reciprocal deals like this but that doesn't stop them often resorting to litigation anyway. The Huawei release notes 'this transaction will close following receipt of the necessary regulatory approvals,' and it will be interesting to see if either the US or Chinese governments feel compelled to poke their nose into the matter.

Sony a1 II

- Effective pixels: 50.0 Million Stacked-CMOS
- Raw shooting with pixel shift/noise reduction mode
- Focal Length Multiplier: 1.0
- Shutter range: 30-1/8000 sec
- Movie Clips: 8K 30fps
- LCD: 3.2” 2,100,100 dots
- Battery: Lithium-Ion NP-FZ100
- Storage: CFexpress A/UHS-II card x 2
- Size: 136 x 97 x 83 mm 743g

Sony FX2

- Effective pixels: 33.0 Million BSI-CMOS
- Cooling fan & Heat sink for video recording
- Focal Length Multiplier: 1.0
- Shutter range: 30-1/8000 sec
- Movie Clips: 4K 30fps
- LCD: 3.0” 1,036,000 dots
- Battery: Lithium-Ion NP-FZ100
- Storage: CFexpress (A) + SDXC(UHS-II) card
- Size: 130 x 104 x 78 mm 679g

Sony a7V

- Effective pixels: 33.0 Million BSI-CMOS
- Blackout-free Shooting at 30fps
- Focal Length Multiplier: 1.0
- Shutter range : 30-1/8000 sec
- Movie Clips: 4K 120fps
- LCD: 3.2” 2,090,000 dots
- Battery: Lithium-Ion NP-F100
- Storage: CFexpress type A + SD (UHS-II) card
- Size: 130 x 96 x 72 mm 695g

UFEL

BRIDGING **GLOBAL MARKETS** WITH **QUALITY & TRUST**

UFEL HK is a seasoned global trading company with over **47 years** of experience in delivering high-quality branded electronics.

With strategic offices in **Hong Kong, Dubai, and China, UFEL HK** combines expertise, innovation, and integrity to provide unmatched products and services worldwide.

UNITED FINANCE & EXPORT LTD

Workshop: No.A8, 11/F., Block A, Texaco Road Industrial Centre, 256-264 Texaco Road, Tsuen Wan, N.T. Hong Kong

Mirrorless Interchangeable Lens(2)

GoPro Mission 1 Pro ILS

- Effective pixels: 1" 50.0 Million CMOS
- Micro Four Third Mount
- Focal Length Multiplier: 2.7-3.0
- Shutter range: 1/8-1/16000 sec
- Movie Clips: 8K 60fps
- LCD: 2.59" Touchscreen
- Battery: Lithium-Ion Endura 2
- Storage: microSD card
- Size: 89,6 x 58.7 x 46.1 mm 197g

Nikon ZR

- Effective pixels: 25.0 Million BSI-CMOS
- Wearing RED Imaging Recipe
- Focal Length Multiplier: 1.0
- Shutter range: 900-1/8000 sec
- Movie Clips: 6K 60fps
- LCD: 4.0" 3,070,000 dots
- Battery: Lithium-Ion EN-EL15C
- Storage: CFexpress type B + SDXC(UHS-I) card
- Size: 133 x 81 x 49 mm 639g

Leica SL3-P

- Effective pixels: 44.9 Million CMOS
- Leica L Mount
- Focal Length Multiplier: 1.0
- Shutter range: 1800-1/16000 sec
- Movie Clips: 8K 24fps
- LCD: 3.2" Touchscreen
- Battery: Lithium-Ion BP-SCL6
- Storage: CFexpress (B) + SDXC (UHS-I/II) card
- Size: 141 x 108 x 84.6mm 768g

Nikon Z50II

- Effective pixels: 21.0 Million CMOS
- 3D tracking AF can recognize 9 subjects
- Focal Length Multiplier: 1.5
- Shutter range: 900-1/4000 sec
- LCD: 3.2" 1,040,000 dots
- Movie Clips: 4K 60fps
- Battery: Lithium-Ion EN-EL25a
- Storage: SD/SDHC/SDXC (UHS II) card
- Size: 127 x97 x 67 mm 550g

Nikon Z5 II

- Effective pixels: 24.0 Million BSI-CMOS
- AF System can recognize 9 types of subject
- Focal Length Multiplier: 1.0
- Shutter range: 900-1/8000 sec
- LCD: 3.2" 2,100,000 dots
- Movie Clips: 4K 30fps
- Battery: Lithium-Ion EN-EL15c
- Storage: SD/SDHC/SDXC (UHS II) card x 2
- Size: 134 x 101 x 72 mm 700g

Leica M EV1

- Effective pixels: 60.0 Million BSI-CMOS
- Built-in Electronic Viewfinder
- Focal Length Multiplier: 1.0
- Shutter range: 3600-1/4000 sec
- Built-in Wi-Fi and Bluetooth
- LCD: 3.0" 2,330,000 dots
- Battery: Lithium-Ion BC-SCL7
- Storage: CFexpress type B + SDXC(UHS-II) card
- Size: 139 x 80 x 38 mm 484g

OM System OM-3 Astro

- Effective pixels: 20.3 Million BSI-CMOS
- Dedicated filter designed to capture red nebulae
- Focal Length Multiplier: 2.0
- Shutter range: 60-1/32000 sec
- LCD: 3.0" 1,620,000 dots
- Movie Clips: 4K 60fps
- Battery: Lithium-Ion BLX-1
- Storage: SD/SDHC/SDXC (UHS I/II) card
- Size: 139 x 89 x 46 mm 496g

OM System OM-5 II

- Effective pixels: 20.0 Million Stacked CMOS
- 4-Stop Live Neutral Density Mode
- Focal Length Multiplier: 2.0
- Shutter range: 60-1/8000 sec
- Movie clips: 4K 24fps
- LCD: 3.0" 1,040,000 dots
- Battery: Lithium-Ion BLS-50
- Storage: SD/SDHC/SDXC (UHS-II) cards
- Size: 125 x 85 x 50 mm 414g

OM System OM-3

- Effective pixels: 20.0 Million Stacked CMOS
- Live Graduated ND
- Focal Length Multiplier: 2.0
- Shutter range: 60-1/8000 sec
- Movie clips: 4K 60fps
- LCD: 3.0" 1,620,000 dots
- Battery: Lithium-Ion BLX-1
- Storage: SD/SDHC/SDXC (UHS-II) cards
- Size: 139 x 89 x 46 mm 496g

Panasonic S1RII

- Effective pixels: 44.0 Million BSI-CMOS
- Leica L Mount
- Focal Length Multiplier: 1.0
- Shutter range: 60-1/8000 sec
- Movie Clips: 8K 30fps
- LCD: 3.0" 1,840,000 dots
- Battery: Lithium-Ion DMW-BLK22
- Storage: CFexpress (B) + SDXC(UHS-II) card
- Size: 134 x 102 x 92 mm 795g

Panasonic Lumix DC-G97

- Effective pixels: 20.0 Million CMOS
- In-body & In-lens images stabilization
- Focal Length Multiplier: 2.0
- Shutter range: 60-1/4000 sec
- Movie clips: 4K 30fps
- LCD: 3.0" 1,840,000 dots
- Battery: Lithium-Ion Rechargeable
- Storage: SD/SDHC/SDXC (UHS-II) cards
- Size: 130 x 94 x 77 mm 530g

Panasonic Lumix DC-GH7

- Effective pixels: 25.0 Million BSI-CMOS
- Internal ProRes RAW recording
- Focal Length Multiplier: 2.0
- Shutter range: 60-1/8000 sec
- Movie clips: 5.7K 30fps
- LCD: 3.0" 1,840,000 dots
- Battery: Lithium-Ion DMW-BLK22
- Storage: SD(UHS-II) + CFexpress type B cards
- Size: 138 x 100 x 100 mm 805g

Panasonic Lumix DC-S9

- Effective pixels: 24.0 Million BSI-CMOS
- Leica L Mount
- Focal Length Multiplier: 2.0
- Shutter range: 60-1/8000 sec
- Movie clips: 6K 30fps
- LCD: 3.0" 1,840,000 dots
- Battery: Lithium-Ion DMW-BLK27
- Storage: SD/SDHCSDXC (UHS-I/II) card
- Size: 126 x 74 x 47 mm 486g

Super Zoom

Sony RX10 V

- Effective pixels: 20.1 Million CMOS
- Blackout-free shooting at 30 fps
- Zoom range: 24-600 mm eqv
- Shutter range: 30-1/16000 sec
- Movie Clips: 4K 120 fps
- LCD: 3.0” 1,620,000 dots
- Battery: Lithium Ion NP-FZ100
- Storage: SD/SDHC/SDXC (UHS-I/II) Card
- Size: 136.4 x 94.5 x 151.3 mm 1111g

Nikon Coolpix A1000

- Effective pixels: 16.0 Million BSI CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 24-840 mm eqv
- Shutter range: 8-1/4000 sec
- Image Stabilizer: Optical
- LCD: 3.0” 920,000 dots
- Battery: Lithium Ion EN-EL12
- Storage: SD/SDHC/SDXC Card
- Size: 114 x 72 x 41 mm 330g

Nikon Coolpix P1100

- Effective pixels: 16.0 Million BSI-CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 24-30000 mm eqv
- Shutter range: 60-1/4000 sec
- Movie Clips: 4k 30 fps
- LCD: 3.2” 921,000 dots
- Battery: Lithium Ion EN-EL20a
- Storage: SD/SDHC/SDXC (UHS-I) Card
- Size: 146 x 119 x 181 mm 1410g

Nikon Coolpix P950

- Effective pixels: 16.0 Million CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 24-2000 mm eqv
- Shutter range: 60-1/4000 sec
- Movie Clips: 4k 30 fps
- LCD: 3.2” 921,000 dots
- Battery: Lithium Ion EN-EL20a
- Storage: SD/SDHC/SDXC Card
- Size: 140 x 110 x 150 mm 1005g

Sony Cyber-Shot DSC-HX99

- Effective pixels: 18.0 Million BSI CMOS
- Fuctional Touchscreen
- Zoom range: 24-720 mm eqv
- Shutter range: 30-1/2000 sec
- Image Stabilizer : Optical
- LCD: 3.0” 922,000 dots
- Battery: Lithium Ion NP BX1
- Storage: SD/SDHC/SDXC/MS Duo Card
- Size: 102 x 58 x 36 mm 242g

Panasonic Lumix DC-FZ80D

- Effective pixels: 18.0 Million BSI-CMOS
- Zoom range: 20-1200 mm eqv
- Shutter range: 4-1/2000 sec
- Image stabilizer: Power O.I.S.
- Movie clips: 4k 30fps
- LCD: 3,0” 1,840,000 dots
- Battery: DMW-BMB9E
- Storage: SD/SDHC/SDXC card
- Size: 130 x 94 x 125 mm 640g

Panasonic Lumix DC-ZS99

- Effective pixels: 20.0 Million BSI-CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 24-720 mm eqv
- Shutter range: 4-1/2000 sec
- Movie Clips: 4k 30 fps
- LCD: 3.0” 1,840,000 dots
- Battery: Lithium Ion DMW-BLG10
- Storage: SD/SDHC/SDXC (UHS-I) Card
- Size: 112 x 68 x 43 mm 322g

Panasonic Lumix DC-ZS300

- Effective pixels: 20.0 Million BSI-CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 24-360 mm eqv
- Shutter range: 60-1/2000 sec
- Movie Clips: 4K 30 fps
- LCD: 3.0” 1,840,000 dots
- Battery: Lithium Ion DMW-BLG 10
- Storage: SD/SDHC/SDXC (UHS-I) Card
- Size: 111 x 66 x 45 mm 337g

Olympus Stylus SH-3

- Effective pixels: 16.0 million BSI-CMOS
- Built-in Wi-Fi
- Zoom range: 25-600 mm eqv.
- Shutter range: 30-1/2000 sec.
- Image stabilizer: 5-axis
- LCD: 3.0” 460,000 dots
- Battery: Lithium-Ion LI-92B
- Storage: SD/SDHC/SDXC Card
- Size: 109×63×42mm, 271g

Leica C-Lux

- Effective pixels: 20.0 Million 1” BSI CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 24-360 mm eqv
- Shutter range: 60-1/2000 sec
- Image stabilizer: Optical
- LCD: 3.0” 1,240,000 dots
- Battery: Lithium Ion Rechargeable
- Storage: SD/SDHC/SDXC (UHS-I) Card
- Size: 13 x 67 x 46 mm 340g

Fujifilm S9900W

- Effective pixels: 16.0 million BSI-CMOS
- Built-in Wi-Fi
- Zoom range: 24-1200 mm eqv.
- Shutter range: 8-1/1700 sec.
- Image stabilizer: Optical
- LCD: 3.0” 460,000 dots
- Battery: 4X AA Batteries
- Storage: SD/SDHC/SDXC Card
- Size: 123×87×116mm, 670g

Canon PowerShot ELPH 360 HS A

- Effective pixels: 20.0 Million BSI-CMOS
- Built-in Wi-Fi
- Zoom range: 24-300 mm eqv
- Shutter range: 15-1/2000 sec
- Movie Clips: 1080 30 fps
- LCD: 3.0” 461,000 dots
- Battery: Lithium Ion NB-11 LH
- Storage: microSD Card
- Size: 100 x 58 x 23 mm 147g

Canon PowerShot SX70 HS

- Effective pixels: 20.0 Million BSI CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 21-1365 mm eqv
- Shutter range: 15-1/2000 sec
- Image Stabilizer: Optical
- LCD: 3.0” 922,000 dots
- Battery: Lithium Ion LP-E12
- Storage: SD/SDHC/SDXC (UHS-I) Card
- Size: 127 x 91 x 117 mm 608g

Pentax WG-8

- Effective pixels: 20.0 Million CMOS
- Waterproof, Freezeproof, Shockproof
- Zoom range: 28-140 mm eqv
- Shutter range: 4-1/4000 sec
- 6 Macro LED lights with 5 levels brightness
- LCD: 3.0" 1,040,000 dots
- Battery: Lithium-Ion DB-110
- Storage: SD/SDHC/SDXC Card
- Size: 118 x 66 x 33 mm 242g

Insta 360 X5

- Effective pixels: 72.0 Million CMOS
- Waterproof down to 15M
- FlowState Stabilization & 360° Horizon Lock
- Shutter range: 120-1/8000 sec
- Movie Clips: 8K 30fps
- LCD: 2.7" Touchscreen
- Battery: Lithium-Ion Rechargeable
- Storage: micro SD/SDHC/SDXC Card
- Size: 46.0 x 124.5 x 38.2 mm 200g

GoPro Mission 1 Pro

- Effective pixels: 1" 50.0 Million CMOS
- Waterproof down to 20M without case
- Zoom range: 15-27 mm eqv
- Shutter range: 1/8-1/16000 sec
- Movie Clips: 8K 60fps
- LCD: 2.59" OLED Touchscreen
- Battery: Lithium-Ion Enduro 2
- Storage: micro SD/SDHC/SDXC Card
- Size: 80.1 x 52.1 x 44.3 mm 207g

Canon PowerShot V1

- Effective pixels: 22.0 Million CMOS
- Cooling fan for video recording
- Zoom range: 16-50 mm eqv
- Shutter range: 30-1/2000 sec
- Movie Clips: 4K 30fps
- LCD: 3.0" 1,040,000 dots
- Battery: Lithium-Ion LP-E17
- Storage: SD/SDHC/SDXC (UHS-II) Card
- Size: 118 x 68 x 53 mm 426g

Leica Q3 Monochrome

- Effective pixels: 60.0 Million CMOS with no colour filter
- Aperture range : F1.7-F16
- Zoom range: 28 mm eqv
- Shutter range: 120-1/2000 sec
- Movie Clips: 8K 30fps
- LCD: 3.0" 1,840,000 dots
- Battery: Lithium-Ion BP-SCL6
- Storage: SD/SDHC/SDXC Card
- Size: 130 x 80 x 93 mm 743g

DJI Osmo Action 6

- Effective pixels: 1/1.1" 38.0 Million CMOS
- Waterproof down to 20M without case
- Variable Aperture F2.0-F4.0
- Built-in Wi-Fi and Bluetooth
- Movie Clips: 8K 30fps
- LCD: 2.5" 285,000 dots
- Battery: Lithium-Ion Rechargeable
- Storage: micro SD/SDHC/SDXC Card
- Size: 72.8 x 47.2 x 33.1 mm 195g

Panasonic L10

- Effective pixels: 20.0 Million 4/3" CMOS
- Aperture range: F1.7-F2.8
- Zoom range: 24-75 mm eqv
- Shutter range: 60-1/2000 sec
- Movie Clips: 5.2K 30fps
- LCD: 3.0" 1,840,000 dots
- Battery: Lithium-Ion DMW-BLK22
- Storage: SD/SDHC/SDXC (UHS-II) Card
- Size: 127 x 74 x 67 mm 508g

Ricoh GR IV Monochrome

- Effective pixels: 26.0 Million CMOS
- Built-in red filter
- Zoom range: 28 mm eqv
- Shutter range: 30-1/4000 sec
- Movie Clips: 1920x1080 60 fps
- LCD: 3.0" Touchscreen
- Battery: Lithium-Ion DB-120
- Storage: micro SD (UHS-I) Card
- Size: 109 x 61 x 33 mm 262g

Fujifilm X100 VI

- Effective pixels: 40.0 Million BSI-CMOS
- Built-in Wi-Fi and Bluetooth
- Zoom range: 35 mm eqv
- Shutter range: 15-1/4000 sec
- Movie Clips: 6.2K 30fps
- LCD: 3.0" 1,620,000 dots
- Battery: Lithium-Ion NP-W126S
- Storage: SD (UHS-I) Card
- Size: 128 x 75 x 55 mm 521g

Fujifilm X half

- Effective pixels: 18.0 Million BSI-CMOS
- Built-in 13 film simulation modes
- Zoom range: 32 mm eqv
- Shutter range: 900-1/2000 sec
- Movie Clips: 1080 24fps
- LCD: 2.4" 920,000 dots
- Battery: Lithium-Ion NP-W126S
- Storage: SD/SDHC/SDXC (UHS-I) Card
- Size: 106 x 64 x 30 mm 240g

Dr FONES AI

Dr Fones Ltd is a global leader in mobile device certification and diagnostics. We specialize in delivering innovative, reliable, and efficient solutions for the mobile device industry

Dr. FONES
FAST ACCURATE RELIABLE

We Diagnose iMac, Mac Book, iPhones & Android, Airpods, Apple Watches

Complete Online Checks: MDM, Carrier Lock, Blacklist, iCloud/FRP, Finance check, Warranty & Full Device Report

CONNECT 20+ DEVICES SIMULTANEOUSLY

AUTOMATED 90+ POINT INSPECTION

LOCKS, FINANCIAL ELIGIBILITY & DIAGNOSTICS

PRINT LABELS AND SECURELY ERASE

Diagnostics
Comprehensive diagnostic services to assess the full functionality of devices.

IMEI Checks
Verification of IMEI numbers to ensure the authenticity and status of devices.

Custom Labels
Create customized labels for devices, ensuring easy identification and tracking.

Cloud-Based Inventory
Manage your inventory through a secure cloud platform for easy access and tracking.

OEM Verification
Verification of original equipment manufacturer (OEM) status for all devices.

ADISA Certified Data Wipe
Certified data wiping to ensure complete and secure data removal (ADISA certification).

24/7 Support
Round-the-clock customer support to assist with all your device testing and management needs.

Core Service

Why Choose Dr Fones?

Dr FONES AI Automation
Speed, Precision & Efficiency in Mobile DiagnosticsTest up to 1000+ devices daily with our advanced Al automation, reducing costs and boosting profits.

Top-quality repairs
We guarantee top-quality repairs through thorough testing and certification, ensuring devices are restored to optimal functionality.

Advanced technology
Laverage cutting-edge technology for rapid, precise diagnostics services that ensure accuracy and reliability.

Boost Effisiensy
Our swift and reliable solutions enhance business operations, allowing you to process devices quickly and efficiently.
